

Timpanogos Caves National Monument Report  
COM3EXA/P11AT00055

PI: Kurt Lancaster, PhD

The purpose of this \$5,000 grant was to develop a multimedia podcast series on the three caves in the Timpanogos cave system. The team went on-site and filmed for a week, then edited six video projects, which will eventually appear on the Timpanogos Caves National Monument website.

It will not only entice potential visitors to come to the caves, but it will also show the beauty of the caves to be assessable for those unable to make the hike (which is described as strenuous).

One lyrical video was shot and edited for each of the three caves: Hansen's, Middle, and Timpanogos, with a fourth one edited by combining all three into one long version. In addition, a historic tour video was produced with Ranger Royce Shelley, and a scientific explanation video was produced with Ranger BJ Cluff.

The project and videos were presented at the "Hawaii International Conference on Arts and Humanities" in January 2012.

An additional project will be created at the Timpanogos Caves National Monument in the summer of 2012.

A handwritten signature in black ink, appearing to read "Kurt Lancaster", with a stylized, cursive script.
