

**Final Report for CESU Agreement Between The Colorado Plateau Cooperative
Ecosystem Studies Unit and Arizona State Museum, The University of Arizona to
Provide Assistance with Updating Records for the Archeological Sites Management
Information System, Intermountain Region, NPS**

TA J8100060195 UAZCP-35
U of A account 357070

The National Park Service (NPS) required technical assistance with archeological data entry and editing for the NPS's Archeological Sites Information Management System (ASMIS) condition assessment project. Information was added to site records already in ASMIS. The University of Arizona provided student employees to evaluate data, acquire new data, enter data in the ASMIS software and transmit data to ASMIS coordinator, Santa Fe. Because of the sensitive nature of archeological records, work was performed at the Western Archeological and Conservation Center on NPS computers.
