DIVISION 8 – OPENINGS

Section Number	Title
08 00 00	OPENINGS

Part 1 - General

Doors and door hardware are to be installed only by qualified persons and all work must meet codes referenced in Division 1. No exceptions will be made to the hardware listed below for use in any construction without prior testing, evaluation and approval by appropriate departments within Owner's Facility Services department (FS).

Part 2 – Products

All doors, hardware, openers, etc. shall be specified as institutional grade throughout.

All hardware submittals shall be routed through Owner's Building Access Services department for review and approval prior to purchase.

Part 3 – Execution

Final acceptance of any hardware installations shall be subject to approval by Owner's Building Access Services department.

DIVISION 8 – OPENINGS

Section Number	Title
08 10 00	DOORS AND FRAMES
08 11 00	Metal Doors and Frames
08 11 13	Hollow Metal Doors and Frames <u>Part 1 - General</u> This section applies to both interior and exterior applications. In general, hollow metal doors should be designed and specified for areas of heavy use and potential abuse. Commercial heavy duty hollow metal frames should be utilized regardless of whether the door be hollow metal, glass, or wood. <u>Part 2 – Products</u> N/A <u>Part 3 - Execution</u>
08 11 19	Stainless-Steel Doors and Frames <u>Part 1 - General</u> Doors and frames shall be commercial heavy duty quality. Minimum door thickness shall be 1-3/4" thick. Interior doors shall comply with SD1-100, Grade II, heavy duty, minimum 16 gauge faces. Exterior doors shall comply with SD1-100 Grade III extra heavy duty, minimum 16 gauge faces. All exterior doors shall have thresholds, closures, weatherstripping, and padded stops. Designs calling for exterior glazed openings in steel doors shall use 1" insulated wire glass. Openings shall be limited to less than 60% glass area (code permitting). At least one section of an exterior door assembly (main ingress and egress) shall have an electric automatic door opener, button activated on both sides, interior and exterior kickplates are required of all doors that are subject to high traffic. <u>Part 2 - Products</u> <u>Door Frames</u> In new construction all frames shall be welded. Knock-downs may be acceptable in building renovation work, pending Owner's Building Access Services approval of submittals and final installation. An inspection of anchoring must be made prior to drywall or closing up of walls. Frames shall have wall anchors a maximum of 16" o.c. per jamb. All door frames will be steel. Exterior door frames will be 14 gauge and protected from rust, internal frames may also be 14-gauge steel.

DIVISION 8 – OPENINGS

Section Number

Title

Door frames shall be factory pre-assembled with mitered fully welded joints ground smooth and delivered to the job site with spreaders. If knock-down and two-piece frames are unavoidable and approved in advanced by Owner's Building Access Services, it must have quality standards for securing and finishing these frames. Shop priming is required.

All frames shall be delivered prior to masonry construction. All frames in masonry walls shall be grouted full with Portland cement grout. Gypsum grout is not permitted.

There shall be seamless end channel closure pieces at door heads.

Doors

All external doors will be 16-gauge steel with vertical steel rib stiffeners and reinforced for all door hardware. Internal doors shall be 16-gauge, or may be solid core wood.

Where doors are to be used as part of an acoustical barrier assembly, they shall be rated a minimum of STC 33.

Doors used as a normal means of ingress and egress shall have either vision panels or adjacent sidelights (where allowable by fire ratings).

Doors shall have a minimum of 3 heavy duty industrial type hinges per door.

Doors and frames shall have a spray applied finish.

There shall be door stops on all installations and closures if doors open into a rated space.

Part 3 – Execution

N/A

08 14 00

Wood Doors

Part 1 - General

This section applies to interior applications. Endangered or limited tree species are not allowable for wood door veneers. Doors receiving painted finishes are limited to low cost species (birch, maple, etc.). Welded hollow metal frames should be utilized.

Part 2 - Products

Wooden doors are acceptable only for interior usage, must be solid core, and have

DIVISION 8 – OPENINGS

**Section
Number**

Title

adhesives that are 100% waterproof. Hollow core doors shall not be used and existing hollow core doors shall not be re-used.

All doors shall be solid core flush with veneer faces, commercial heavy duty minimum grade, 1-3/4" thick. Minimum width to be 3'-0". Maximum height to be 7'-0". **3'0" x 7'0" doors are the Owner's standard. Exceptions must be reviewed and approved by Owner's Building Access Systems. Specified requirements for non-standard doors are available through Owner's Carpentry department if approval is granted.**

Doors for renovation work shall be drilled to match existing handle-set elevations.

All doors should be from a single manufacturer.

Formaldehyde off-gassing rates must be less than .03 milligrams per square foot of surface/hr in accordance with ASTM D5116-90.

Doors shall carry a life of installation warranty from the manufacturer. All doors that are warped after installation, shall be replaced prior to substantial completion. Substantial completion cannot be achieved if one hour rated corridors integrity is compromised by warped doors.

Where doors are to be used as part of an acoustical barrier assembly, they shall be rated a minimum of STC 33.

Door receiving a stained finish shall have premium quality face veneers, minimum thickness 1/16". Doors receiving a paint finish shall be smooth, faux wood grain, or pre-primed skin.

Doors used as a normal means of ingress and egress shall have either vision panels or adjacent sidelights (where allowable by code) in metal frames.

Doors shall have a minimum of 3 heavy duty type hinges per door.

Doors and frames shall have a spray applied finish where specified.

All doors subject to heavy traffic shall have kickplates both sides.

Part 3 - Execution

Inspection

The Contractor is required to have Owner's Carpentry department inspect and approve door installation after doors and jams have been installed and prior to casing installation. Failure to have approval will require the Contractor to remove the casing for inspection at Contractor's expense.

DIVISION 8 – OPENINGS

Number

Title

Wood frame pre-hung doors installed in renovations to existing buildings

All pre-hung interior door assemblies shall be inspected after hanging, and before the casing is applied. Assemblies which do not meet specifications shall be re-hung and re-inspected before casing is applied.

All paint grade doors shall be pre-primed.

Doors must be standard sizes whenever possible (ie: 6'-8" tall, 2'-0", 2'-4", 2'-6", 2'-8" or 3'-0" wide)

Installation

All pre-hung door assemblies shall be fastened to the framing with a minimum of 5 groups of 2, 2 ½" nails on both hinge and jamb sides.

Both jamb and hinge sides will use a minimum of three shimmed contact points.

One screw per hinge will penetrate the rough opening framing by at least 1"

Hinge, jamb, and head legs of the pre-hung assembly will be straight to within 1/8" deviation along their total length.

Hinge and jamb legs will be installed to within 1/8" of plumb.

Closed doors shall show a reveal of 1/8" on all three sides of the jamb unit, and ½" to ¾" above the finished flooring.

Doors shall open, close, and latch without excessive force.

Closet door hardware

When closet door ball catches are used, they shall be Grainger model 1VZX5C or equivalent.

08 17 00

Integrated Door Opening Assemblies

08 70 00	HARDWARE

PART 1 - GENERAL

1.1 SUMMARY

A. Section includes:

1. Mechanical door hardware for the following:
 - a. Swinging doors.
 - b. Sliding doors.
2. Cylinders for door hardware specified in other Sections.
3. Electrified door hardware.
4. Padlocks

B. Related Sections:

1. Section 08 11 13 "Hollow Metal Doors and Frames" for astragals provided as part of labeled fire-rated assemblies and for door silencers provided as part of hollow-metal frames.
2. Section 08 41 13 "Aluminum-Framed Entrances and Storefronts" for door silencers provided as part of aluminum frames.
3. Section 08 10 00 "Doors and Frames" for access door hardware, except cylinders.
4. Section 08 70 00, 2.16 "Overhead Stops and Holders" for door hardware provided as part of overhead door assemblies.
5. Section 10 22 13 "Wire Mesh Partitions" for door hardware for doors in wire mesh partitions, except cylinders.
6. Section 28 06 10 "Schedules for Access Control" for electric locks, exit devices and strikes provided in 08 70 00.
7. Section 08 42 29 "Automatic Door Operators".
8. Section 06 41 93 "Cabinet and Drawer Hardware".

1.2 ACTION SUBMITTALS

A. Product Data: For each type of product indicated. Include construction and installation details, material descriptions, dimensions of individual components and profiles, and finishes.

B. Shop Drawings: Details of electrified door hardware, indicating the following:

1. Wiring Diagrams: For power, signal, and control wiring and including the following:
 - a. Details of interface of electrified door hardware and building safety and security systems.
 - b. Schematic diagram of systems that interface with electrified door hardware.
 - c. Point-to-point wiring.

DIVISION 8 – OPENINGS

Number

Title

- d. Risers.
 - e. Elevations doors controlled by electrified door hardware.
 - 2. Operation Narrative: Describe the operation of doors controlled by electrified door hardware.
- C. Other Action Submittals:
- 1. Door Hardware Schedule: Prepared by or under the supervision of Installer, detailing fabrication and assembly of door hardware, as well as installation procedures and diagrams. Coordinate final door hardware schedule with doors, frames, and related work to ensure proper size, thickness, hand, function, and finish of door hardware.
 - a. Submittal Sequence: Submit door hardware schedule concurrent with submissions of Product Data, Samples, and Shop Drawings. Coordinate submission of door hardware schedule with scheduling requirements of other work to facilitate the fabrication of other work that is critical in Project construction schedule.
 - b. Format: Comply with scheduling sequence and vertical format in the Door Hardware Institute's (DHI) "Sequence and Format for the Hardware Schedule." Double space entries, and number and date each page.
 - c. Format: Use same scheduling sequence and format and use same door numbers as in the Contract Documents.
 - d. Content: Include the following information:
 - 1) Identification number, location, hand, fire rating, size, and material of each door and frame.
 - 2) Locations of each door hardware set, cross-referenced to Drawings on floor plans and to door and frame schedule.
 - 3) Complete designations, including name and manufacturer, type, style, function, size, quantity, function, and finish of each door hardware product.
 - 4) Description of electrified door hardware sequences of operation and interfaces with other building control systems.
 - 5) Fastenings and other pertinent information.
 - 6) Explanation of abbreviations, symbols, and codes contained in schedule.
 - 7) Mounting locations for door hardware.
 - 8) List of related door devices specified in other Sections for each door and frame.
 - 2. Keying Schedule: Prepared by Owner's Building Access Services department and incorporated into the finished hardware submittal and coordinated with the Contract Documents.

DIVISION 8 – OPENINGS

having jurisdiction and approved by Owner are acceptable.

- D. Fire-Rated Door Assemblies: Where fire-rated door assemblies are indicated, provide door hardware rated for use in assemblies complying with NFPA 80 that are listed and labeled by a qualified testing agency, for fire-protection ratings indicated, based on testing at positive pressure according to NFPA 252 or UL 10C, unless otherwise indicated.
- E. Smoke- and Draft-Control Door Assemblies: Where smoke- and draft-control door assemblies are required, provide door hardware that meet requirements of assemblies tested according to UL 1784 and installed in compliance with NFPA 105.
 - 1. Air Leakage Rate: Maximum air leakage of 0.3 cfm/sq. ft. at the tested pressure differential of 0.3-inch wg of water.
- F. Electrified Door Hardware: Listed and labeled as defined in NFPA 70, Article 100, by a testing agency acceptable to authorities having jurisdiction.
- G. Means of Egress Doors: Latches do not require more than 15 lbf to release the latch. Locks do not require use of a key, tool, or special knowledge for operation.
- H. Accessibility Requirements: For door hardware on doors in an accessible route, comply with the U.S. Architectural & Transportation Barriers Compliance Board's ADA-ABA Accessibility Guidelines.
 - 1. Provide operating devices that do not require tight grasping, pinching, or twisting of the wrist and that operate with a force of not more than 5 lbf.
 - 2. Comply with the following maximum opening-force requirements:
 - a. Interior, Non-Fire-Rated Hinged Doors: 5 lbf applied perpendicular to door.
 - b. Fire Doors: Minimum opening force allowable by authorities having jurisdiction.
 - 3. Bevel raised thresholds with a slope of not more than 1:12. Provide thresholds not more than 1/2 inch high per ANSI 117.1.
 - 4. Adjust door closer sweep periods so that, from an open position of 70 degrees, the door will take at least 3 seconds to move to a point 3 inches from the latch, measured to the leading edge of the door.
- I. Keying Conference: Conduct conference at Project site to comply with requirements in Division 1. In addition to Owner, Contractor, and Design Professional, conference participants shall also include installer's Architectural Hardware Consultant and Owner's security consultant.

1.	Schlage Commercial Lock Division; an Allegion company. Owner's request.
a.	Request-to-Exit built in to the inside lever
2.6	SELF-CONTAINED ELECTRONIC LOCKS
A.	Self-Contained Electronic Locks: BHMA A156.25, mortise; with internal, battery-powered, self-contained electronic locks; consisting of complete lockset, motor-driven lock mechanism, and actuating device; enclosed in zinc-dichromate-plated, wrought-steel case, and strike that suits frame. Provide key override, low-battery detection and warning, LED status indicators, and ability to program at the lock.
1.	Schlage Commercial Lock Division; an Allegion company.
2.7	AUTOMATIC AND SELF-LATCHING FLUSH BOLTS
A.	Automatic and Self-Latching Flush Bolts: BHMA A156.16; minimum 3/4-inch throw; designed for mortising into door edge.

DIVISION 8 – OPENINGS

Section Number	Title
	1. Trimco manufacturing or Ives hardware.
2.8	EXIT DEVICES AND AUXILIARY ITEMS
	A. Exit Devices and Auxiliary Items: BHMA A156.3.
	1. Precision Hardware or Sargent
	a. Use rim type device with cylinder dogging. Precision Apex 2000-CD series or Sargent 16-80 series in 626 or 630 finish as specified.
	b. Fire rated openings shall have devices related accordingly.
	c. Exterior doors requiring panic hardware must have cylinder dogging feature (CD).
	d. Paired opening shall use 2 rim type devices with steel, keyed removable mullions provided by the same manufacturer as the exit devices.
	e. When electrified exit devices are used they shall be by Precision. They shall have low voltage motorized latch retraction with Request-To-Exit switches. Power Supplies shall be of the same exit device manufacturer.
	f. Electrified Exit device trims shall not be used unless driven by code requirements.
	g.
	h.
2.9	PERMANENT CORES
	A. Permanent cores: Tumbler type, constructed from brass or bronze, stainless steel, or nickel silver.
	1. Best Locks, a Stanley Security Company
	a. Small Format 7 pin removable core
	b. D, E, J, K, L, M, F, G, H, Q, WC, WG, TD, SC, WH and TB keyways.
	c. Provide construction cores that are replaceable by permanent cores.
2.10	KEYING
	A. Keying System:
	1. Best Locks, a Stanley Security Company
	a. All cores to be keyed to the Owner's existing Grand Master Key System. Please contact Owner's Building Access Services to determine the keyway to be used on each project.
	B. Keys:
	1. Stamping: Permanently inscribe each key with a visual key control number and include the following notation:
	a. Notation: "DO NOT DUPLICATE."
	2. Quantity: In addition to one extra key blank for each lock, provide

the following:

- a. Cylinder Change Keys: Three
- b. Master Keys: Three
- c. Control Key: Two
- d. Construction Operating Keys: Ten
- e. Construction Control Key: Three

2.11 KEY CONTROL SYSTEM

- A. Key Control Cabinet: BHMA A156.5; metal cabinet with baked-enamel finish; containing key-holding hooks, labels, 2 sets of key tags with self-locking key holders, key-gathering envelopes, and temporary and permanent markers; with key capacity of 150 percent of the number of locks.
 1. Multiple-Drawer Cabinet: Cabinet with drawers equipped with key-holding panels and key envelope storage, and progressive-type ball-bearing suspension slides. Include single cylinder lock to lock all drawers.
- B. Key Lock Boxes: Designed for storage of two keys, with tamper switches to connect to intrusion detection system.
 1. Manufacturers: Subject to compliance with requirements, provide products by the following:
 - a. Knox Company.

2.12 SURFACE CLOSERS

- A. Surface Closers: BHMA A156.4; rack-and-pinion hydraulic type with adjustable sweep and latch speeds controlled by key-operated valves and forged-steel main arm. Comply with manufacturer's written recommendations for size of door closers depending on size of door, exposure to weather, and anticipated frequency of use. Provide factory-sized closers, adjustable to meet field conditions and requirements for opening force.
 1. Stanley Closers
 - a. QDC100 surface mounted series with Extra Heavy Duty arms, SRI coating and delayed action.
 - b. Powder coated aluminum finish (689)
 - c. Spring Cush Arms shall be used when doors swing only 90 degrees.
 - d. Hold Open arms shall NOT be used unless designated by the Owner.
 - e. Gate Closers shall conform to these same standards.
 2. Allegion LCN 4040XP-EDA-TBWMS-ALUM closers must be installed by through-bolting the closer (with sexnuts) to the door with 1/4-

20 hardware. The closer shoe must be attached to the frame by all five mounting points. In the case of aluminum frames, the shoe must be attached with 1/4-20 nutserts (aka rivetnuts) installed in the frame and using LCN 4040-61 Blade Stop Spacers. If necessary due to inadequate jamb reveal, the fifth attachment point will be accomplished by using LCN 4040-30 Cush Shoe Supports.

Frames shall be the following or approved equal:

2.13 MECHANICAL STOPS AND HOLDERS

- A. Wall- and Floor-Mounted Stops: BHMA A156.16; aluminum base metal.
 - 1. IVES Hardware or Trimco Manufacturing
 - a. Heavy Duty Floor type stop, Ives FS18S or Trimco 1209 in black
 - b. Convex or concave wall stops depending on locking hardware. Ives WS401 series or Trimco 1270 series with appropriate securing packs for the application.

2.14 ELECTRONIC STOPS AND HOLDERS

- A. Wall Mount: BHMA A156
 - 1. ABH or Dorma
 - a. All metal housing, standard profile with recessed wall mount.
 - b. They shall be tri-voltage with pivoting armatures.

2.15 OVERHEAD STOPS AND HOLDERS

- A. Overhead Stops and Holders: BHMA A156.8.
 - 1. ABH Manufacturing Inc. or IVES Hardware
 - a. 900 Series surface mounted, 626 finish.

2.16 METAL PROTECTIVE TRIM UNITS

- A. Metal Protective Trim Units: BHMA A156.6; fabricated from 0.050-inch-thick stainless steel; with manufacturer's standard machine or self-tapping screw fasteners.
 - 1. IVES Hardware or Trimco Manufacturing
 - a. Kick plates and armor plates shall be .050 gage stainless steel, 12 inches high, beveled 4 sides with countersunk screws.
 - b. Latch Guards on all exterior doors

2.17 DOOR GASKETING

- A. Door Gasketing: BHMA A156.22; air leakage not to exceed 0.50 cfm per foot of crack length for gasketing other than for smoke control, as tested according to ASTM E 283; with resilient or flexible seal strips that are easily replaceable and readily available from stocks maintained by manufacturer.

adequately serve doors with electrified door hardware.

- G. Thresholds: Set thresholds for exterior doors and other doors indicated in full bed of sealant complying with requirements specified in Section 07 92 00 "Joint Sealants and Caulking".
- H. Stops: Provide floor stops for doors unless wall or other type stops are indicated in door hardware schedule. Do not mount floor stops where they will impede traffic.
- I. Perimeter Gasketing: Apply to head and jamb, forming seal between door and frame.
- J. Meeting Stile Gasketing: Fasten to meeting stiles, forming seal when doors are closed.
- K. Door Bottoms: Apply to bottom of door, forming seal with threshold when door is closed.

3.4 ADJUSTING

- A. Initial Adjustment: Adjust and check each operating item of door hardware and each door to ensure proper operation or function of every unit. Replace units that cannot be adjusted to operate as intended. Adjust door control devices to compensate for final operation of heating and ventilating equipment and to comply with referenced accessibility requirements.
 - 1. Spring Hinges: Adjust to achieve positive latching when door is allowed to close freely from an open position of 30 degrees.
 - 2. Electric Strikes: Adjust horizontal and vertical alignment of keeper to properly engage lock bolt.
 - 3. Door Closers: Adjust sweep period to comply with accessibility requirements and requirements of authorities having jurisdiction.
- B. Occupancy Adjustment: Approximately three months after date of Substantial Completion, installer's Architectural Hardware Consultant shall examine and readjust each item of door hardware, including adjusting operating forces, as necessary to ensure function of doors, door hardware, and electrified door hardware.

3.5 CLEANING AND PROTECTION

- A. Clean adjacent surfaces soiled by door hardware installation.
- B. Clean operating items as necessary to restore proper function and finish.

DIVISION 8 – OPENINGS
