Achievement of Degree Program Expectations by College as of July 31, 2022
All Academic Units: Flagstaff Mountain Campus and Extended Campuses

Introduction
Background
The Degree Program Expectations were developed and approved by the Faculty Senate in M202014 to ensure all programs are working towards similar expectations aligned with high-quality student learning, and consistently engaging in assessment and continual improvement requirements set forth by the Higher Learning Commission. The Degree Program Expectations are as follows:

1. Degree Program Purpose
2. Degree Program Student Learning Outcomes
3. Curriculum Design with a Curriculum Matrix (Map)
4. Strategic Course Design which supports Degree Program Student Learning Outcomes
5. Systematic Assessment of Degree Program Student Learning Outcomes (*All Degree Program Student Learning Outcomes must be assessed <u>at least once</u> during the Academic Program Review or Specialized Accreditation period. Academic units having specialized accrediting agencies that require more frequent assessment should follow their accreditor's requirements.*)
6. Use of Assessment Findings for Continual Improvement

Academic units are expected to achieve and maintain all six expectations for their degree programs as part of their Academic Program Review/ Specialized Accreditation. Undergraduate and graduate certificates and minors are only required to achieve the first two expectations (a purpose statement and learning outcomes).

Purpose and Methods
The primary purpose of this report is to identify degree programs' achievement and maintenance of the five Degree Program Expectations (all areas but Strategic Course Design, which we are currently unable to track). Degree Program Expectations must be achieved or maintained at some point between Academic Program Reviews or Discipline-Specific Accreditations. We hope that inclusion of these dates, identified in the table as the "Last Site Visit" and the "Next Site Visit" will assist units in planning their curriculum and assessment activities to achieve and/or maintain the Degree Program Expectations in preparation for their next site visit.

To ensure evidence is present for each expectation, we examined the Annual Curriculum & Assessment Report Archives and Academic Catalog Plan Proposals (since 2011-12). The list of programs represents the degree programs available in the <u>202022-23 Academic Catalog</u>. Some academic units submitted paperwork to add programs, eliminate programs, or change program names for AY2023-24. These changes are not present in this report.

Key to column headings:
- Academic Unit = Name of school or department responsible for maintaining the academic programs.
- Degree Program = Name of the academic program.
- Last Site Visit = Academic year of the most recent previous site visit by external reviewers.
- Next Site Visit = Academic year of the coming site visit by external reviewers.
- Purpose Statements = Well-articulated description of the goals and aims of the degree program, certificate or minor.

- Student Learning Outcomes = Statements of what students will learn upon completion of a degree program, certificate or minor.
- Curriculum Map/ Matrix = A visual representation of how the program's learning outcomes are achieved by the program's course requirements (*including courses required outside of the academic unit*).
- Systematic Assessment = Assessment of degree program learning outcomes (*All Degree Program Student Learning Outcomes must be assessed <u>at least once</u> during the Academic Program Review or Discipline-Specific Accreditation period*).
  - Assessment Design – The creation of valid methods of assessment to qualitatively or quantitatively measure students' learning. Focuses on directly measuring student's abilities, rather than on student opinions of their learning.
  - Data Collection – Collecting and compiling qualitative and quantitative information about student learning.
  - Analysis/ Findings/ Conclusions – Analyzing the data collected about student learning, and documenting the findings and conclusions of the analysis.
- Use of Findings or Curriculum Re-Design = Either (1) a program engaged in a re-design of their program's entire curriculum; or (2) assessment findings are evaluated by program faculty and based on the findings, the program faculty either (a) make changes or improvements to the curriculum, (b) make changes or improvements to the assessment design, data collection or analysis methods, and/or (c) publicize student learning strengths.
