How to Find Late Starting Classes
Transcript

Let's take a look at how to find late starting classes from the LOUIE class search.

Late starting classes are classes that begin after the semester has already begun.

In order to find late start classes, we will need to use the "Additional Search" option in the search menu. There are a couple ways of finding late start classes. The first is using the "Starting Month" drop-down. The other way is the "Session" drop-down. The sessions are separated by the weeks they occur during the 16-week term. From here you can select 'Mountain 7.5 Week-Second' or 'Mountain 5 Week-Second' or third.
