

## Louie Requisite Errors Transcript

Let's take a look at requisite errors in LOUIE. When enrolling in classes, you may notice that some of them list requisites in order to enroll. These come in two versions: prerequisites, which are requirements needed before you can enroll or corequisites, which are requirements you need to complete in conjunction with the class in question.

If you're attempting to enroll in a class and you receive the following error message: "Error: Unable to add this class - requisites have not been met." It means you are missing a key component required to enroll in the class.

If you are missing the prerequisite, you likely won't be able to enroll in the class until the prerequisite is completed. If you're missing the corequisite, try enrolling in both classes at the same time!
