

Louie Time Conflict Errors Transcript

Let's take a look at time conflict errors in LOUIE. When enrolling in classes, you may encounter a time-conflict error.

If you receive an error that says, "You cannot add this class due to a time conflict with class XXX. Select another class."

This means that the class you are attempting to enroll in has an overlap with the timing of another class, and the enrollment will not be able to go through. The easiest solution will be to find a different class to enroll in.

One additional note: the 4–5-digit number provided in the error message will indicate which course you are enrolled in that is causing the error to occur.
