

Are you ready for a more streamlined and effective way to teach at Northern Arizona University? Get ready for Canvas! As the new Learning Management System starting Summer 2023, Canvas will change the way you deliver education and support student success. Now is the time to prepare for the transition from Blackboard to Canvas. And the good news is, you have options!

Choose to refresh your content by building your course from scratch! With this option you'll truly learn the in's and out's of Canvas from the get-go!

You can also choose the self-guided migration path and take control of your course content. With this option, you can broaden your knowledge and expertise of Canvas, select only the content that is most important to you, reevaluate your course structure and workflow, and even rethink how you engage students with course materials and assessments.

Or, take the stress out of migration with the K16 Solutions process. With this option, your entire Blackboard course will be transferred over to Canvas, ready for you to review and fine-tune. This option may not yet be available, so please work with your academic leadership to see if K16 would work for your courses.

No matter which option you choose, the switch to Canvas will bring a wealth of new possibilities for enhancing the teaching and learning experience at Northern Arizona University. So get ready to say hello to a whole new world of possibilities with Canvas! For more information, see the LMS Transition site: nau.edu/lms-transition.
