Addendum 3
Request for Proposal Number: P21AM006
Parking Management Solution

Please note the following on the above referenced Request for Proposal.

1. Section E.15.2: Replace in its entirety with the following:

    15.2. Describe ability to provide a PARCS system using existing hardware, including but not limited to the following:

    15.2.1. Real-time occupancy analytics of up to fourteen-hundred (1400) garage spaces.
    15.2.2. Separate access control permissions for multiple types of users.
    15.2.3. Integration with existing revenue collection software and /or hardware.
    15.2.4. Pay-on-Exit physical access hardware.
    15.2.5. Administration functions to cover multiple segments with the ability to restrict users' access within segments.
    15.2.6. Standalone revenue collection station(s) featuring gated entries and exits with vehicles present.
    15.2.7. Indicate additional hardware components or software needed to ensure compatibility with existing hardware.
