CLINICAL EXPERIENCE

Northern Arizona University Speech-Language-Hearing Clinic, Flagstaff, AZ

Spring 2014-Present

Graduate Student Clinician

- Developed and implemented setting-appropriate intervention plans targeting variety of communication deficits including: articulation, early literacy skills, feeding and swallowing, pragmatics, fluency, language impairment, aphasia, dementia, and adults with intellectual disabilities and co-occurring disorders
- Collaborated with clients and family members to incorporate functional activities to meet the needs of the client.
- Implemented age-appropriate, functional intervention plans with appropriate materials and instrumentation for prevention and provided counseling to clients and caregivers regarding therapy intervention, compensatory strategies, and recommendations.
- Designed and implemented speech and language evaluations with adult and pediatric populations by administering appropriate assessments such as the *CELF-5*, oral mechanism examination, *CELF-2 Preschool*, *OWLS*, *ADP*, *CAAP*, *FAVRES*, *BNT*, *RCBA-2*, *WAB-R*, *RBMT-3*, and informal speech and language samples.
- Interpreted and synthesized case history information collected from clients, family, and teachers with information collected from evaluation assessments to diagnose and make appropriate recommendations for interventions.
- Participated in over 20 hours of adult diagnostic voice evaluations with rigid laryngovideostroboscopy (LVS) and Computerized Speech Lab (CSL).
- Performed community hearing screenings and assisted audiologist with audiological evaluations including otoscopic examinations, acoustic immittance measurement, audiometry, pure tone testing, masking, and assistance with hearing aids.

Emeritus Senior Living, Flagstaff, AZ

Fall 2014-Present

Graduate Student Clinician

- Integrated reminiscence therapy and validation approach within intervention plans for clients diagnosed with dementia.
- Developed intervention plans to reduce perseveration through redirecting, decrease tangential conversation, and increase turn-taking in order to increase client's ability to maintain communication.
- Evaluated clients using the Functional Linguistic Communication Inventory (FLCI) in order to determine the client's baseline functioning, severity of dementia, and preserved functional skills.
- Devised individualized intervention plans and strategies during meal times for clients with dysphagia.
