Colorado River Indian Tribes Demographic Analysis

Introduction

This analysis of Colorado River Indian Tribes was undertaken by the Arizona Rural Policy Institute (ARPI) a unit of the Center for Business Outreach in the W.A. Franke College of Business at Northern Arizona University for the planning department of the Colorado River Indian Tribes. The ARPI has produced the Demographic Profile for the Colorado River Indian Tribes, with the latest information available from the 2015 American Community Survey (5-year estimates) American Indian and Alaska Native Tables. This document is provided to Arizona tribes as a product of the EDA University Center Grant provided by the EDA to the Center for Business Outreach at Northern Arizona University.

Since 2010 the American Community Survey (ACS) has been tasked with producing population, demographic and housing unit estimates for the United States on an annual and 5 year series basis. This analysis is entirely based the American Community Survey, 5-year estimate data for the period 2011 to 2015 and is annotated in the document as ACS 2015 (5-year estimates). The 2015 ACS 5-year estimates are based on data collected between January 2011 and December 2015. The data were used to analyze household income, poverty rates and household characteristics for Colorado River Indian Tribes. Only the 5-year estimates are used as this is the only data that is provided for small population areas, the 5 year data represent the average characteristics over the 5-year period.

Demographic characteristics are outlined by three separate levels, the State of Arizona, La Paz County and the Colorado River Indian Tribes. Comparisons between the State of Arizona, and La Paz County serve to provide further levels of comparison when examining demographic characteristics of the tribe. La Paz County was chosen for comparison as a majority of Colorado River Indian Tribes tribal lands and communities fall in La Paz County.

Appendix A contains the margin of error estimates to be used to calculate the range of estimates for the American Community Survey data.

Population

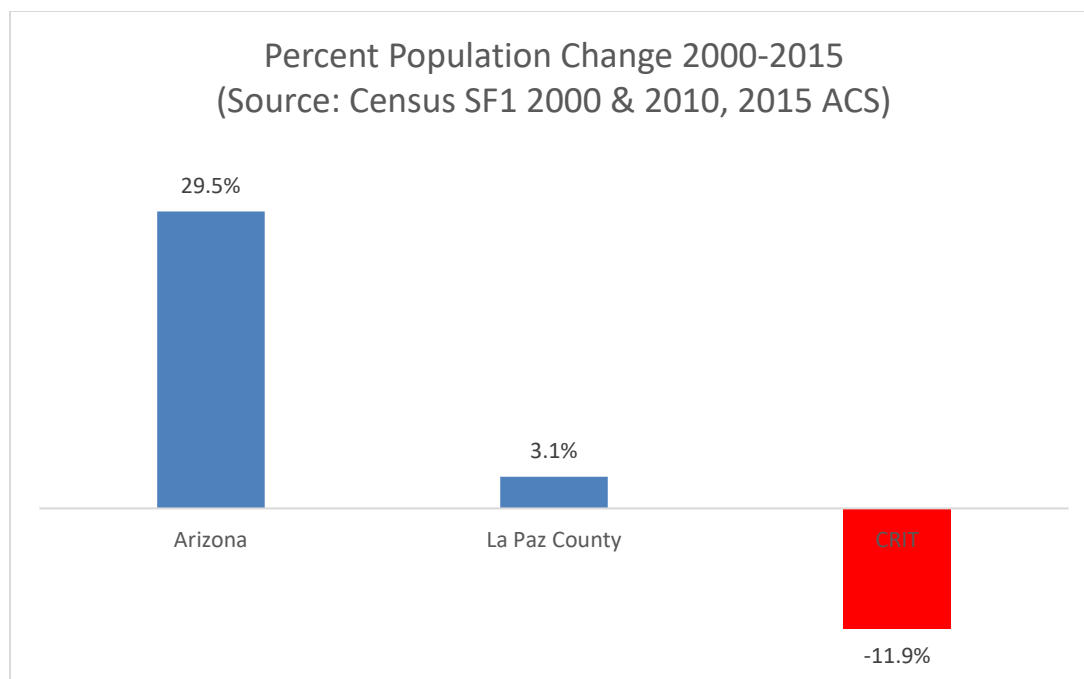

The population of the Colorado River Indian Tribes decreased, at a rate of 7.5% between the last census in 2010 and 2015. The population of the Colorado River Indian Tribes also decreased between 2000 and 2010, at a slower rate was 4.7%. The 2010 SF1 census is considered the official count, and accounts for only the population within the exterior boundaries of the Colorado River Indian Tribes. The rate of population growth is lower than both the State and the County. This rate, however, reflects growth by birthrate alone and not growth through immigration as is the case with both the State and the County. Outmigration to border communities also impacts the population count as only on-reservation populations are counted.

Table 1. Total Population & Trends

Total Population and Trends	Arizona	La Paz County	Colorado River Indian Tribes
Total Population 2000	5,130,632	19,715	9,201
Total Population 2010	6,392,017	20,489	8,764
Total Population 2011-2015	6,641,928	20,335	8,106
Change in Population 2000-2010	29.5%	3.1%	-11.9%

Source: Census 2000, 2010 SF1, ACS 2015 (5 year estimates)

Figure 1. Percent Population Change 2000 to 2015 Colorado River Indian Tribes

Gender

There are slightly more males (50.2%) than females (49.8%) within the Colorado River Indian Tribes. The gender ratios in the Colorado River Indian Tribe are similar to the State and County ratios where there are slightly fewer females (50.3% and 49.0%) respectively than males (49.7% and 51.0%) respectively. See Table 2.

Table 2. Gender Ratios

	Arizona	La Paz County	Colorado River Indian Tribes
Male	3,299,088	10,378	4,067
Female	3,342,840	9,957	4,039

Source: ACS 2011-2015

Age

The Colorado River Indian Tribe is dominated by those under 20 years of age. The under-20 year population accounts for almost a third (29.7%) of all tribal members, representing a far larger portion of tribal members than the same age group does for the State (27.1%) or La Paz County (19.5%). The fact that one-third of the tribe is younger than 20 years of age carries with it some fairly important policy implications. The large portion of younger tribal members influences the provision of health and educational services as well as poverty and workforce issues as well.

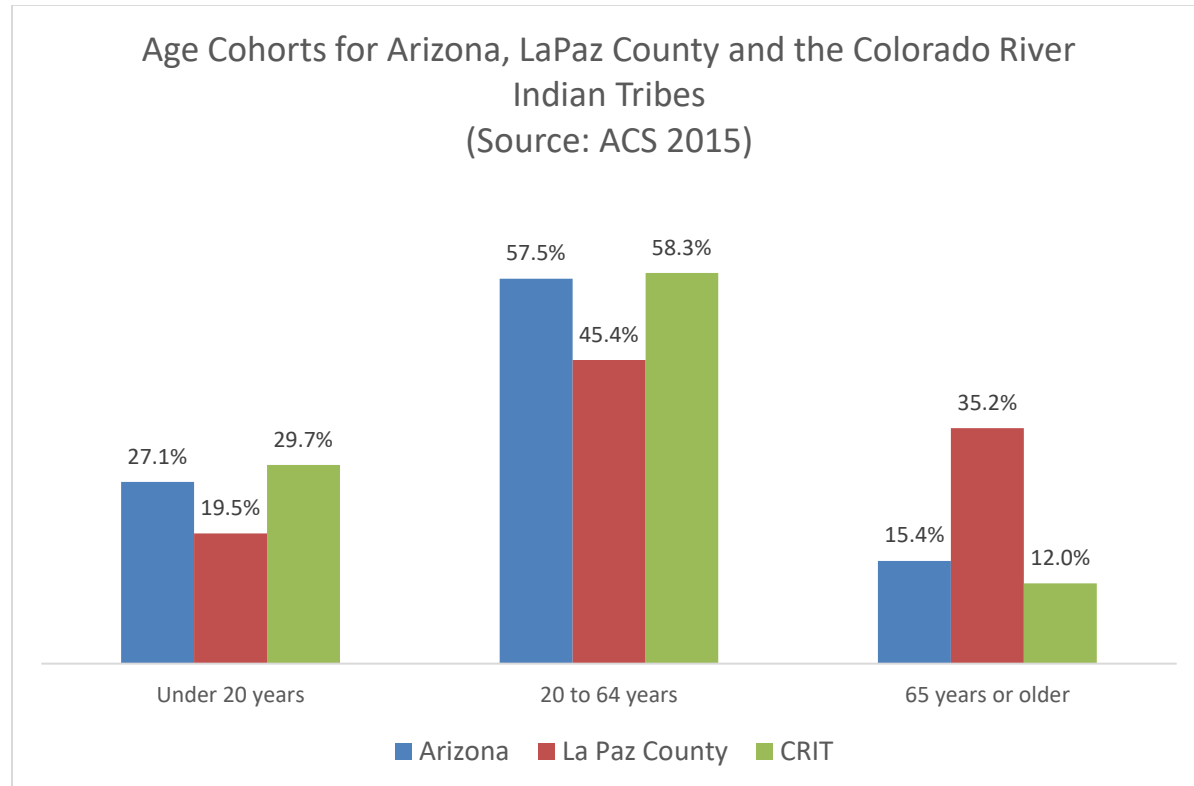

On the other hand, the tribe has fewer members who are 65 years or older. This age group, those who have retired and are out of the workforce account for only 12.0 percent of tribal members when compared to 15.4 percent for the state and 35.2 percent for the county. Finally, those age 20 to 64 years account for 58.3 percent of the tribal members, which compares favorably to the State (57.5%) and is larger than the County (45.4%) which is dominated by those 65 years and older (35.2%). The large number of tribal young persons will have an effect on the development of the tribal workforce in the future. See Table 3, and Figure 2.

Table 3. Age Groups by 5 Year Cohorts

	Arizona	La Paz County	Colorado River Indian Tribes
Under 5 years	433,835	932	594
5 to 9 years	455,634	1096	657

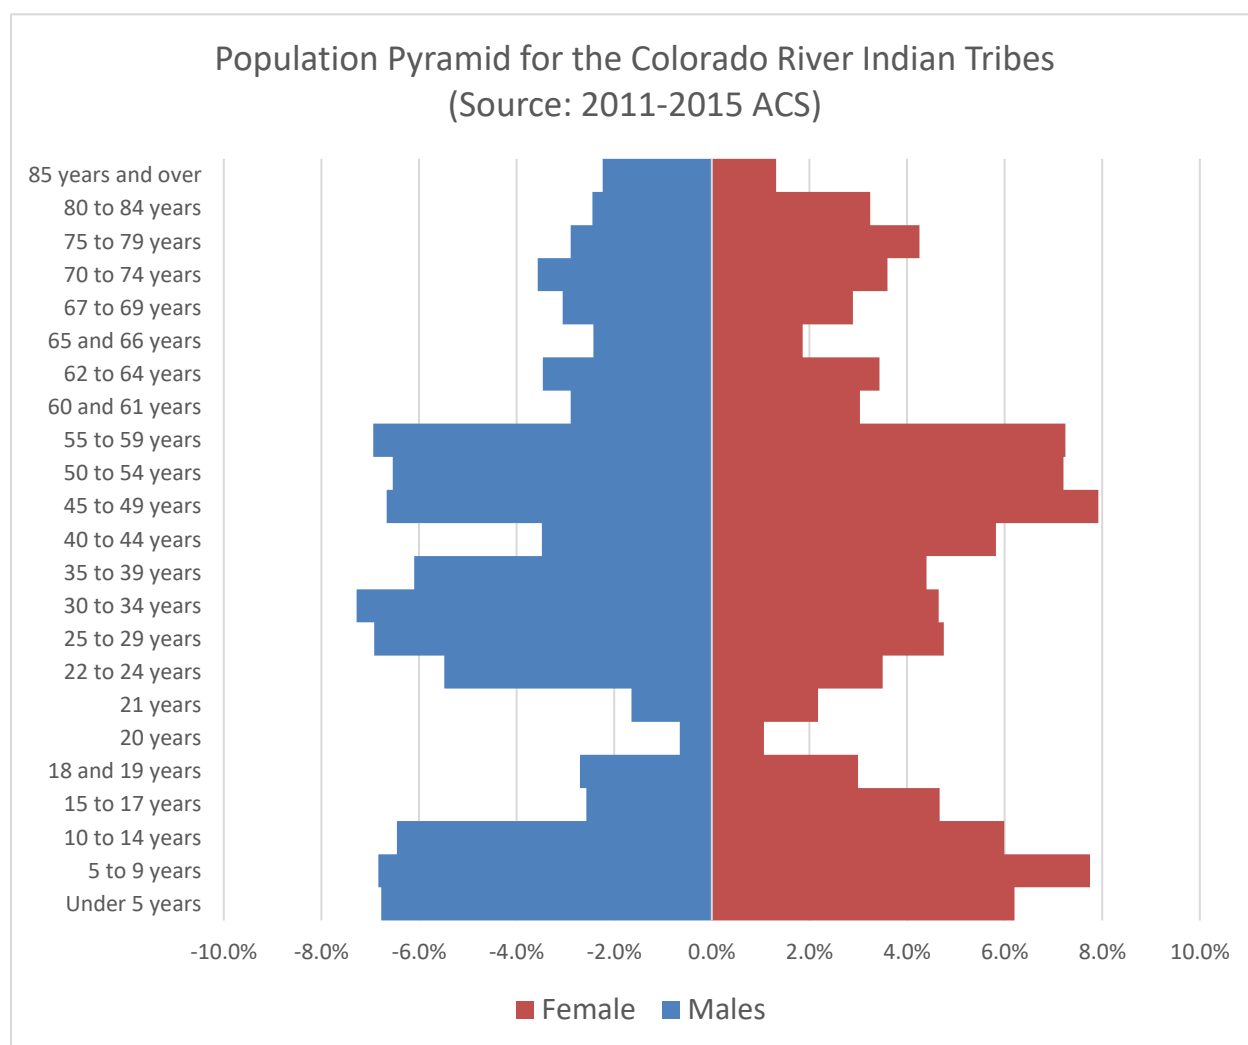

Figure 2. Age Cohorts for Arizona, La Paz County & Colorado River Indian Tribes 2011-2015

A population pyramid, also called an age structure diagram, is a graphical illustration that shows the distribution of various age groups in a population (typically that of a country or region of the world), which forms the shape of a pyramid when the population is growing.

The population pyramid below (Figure 3) illustrates the difference between males and females for the 5 year age cohorts. The under-17 age cohorts are somewhat symmetrical indicating that there are an even number of males and females. At the top of the age pyramid there are more females than males. This is normal as demographically women tend to live longer than men. The age pyramid provides an illustrated snapshot of the age structure of the tribal members during the period 2011-2015.

Figure 3. Population Pyramid - Colorado River Indian Tribes 2011-2015

Population Under 19 Years

Children those under 19 years of age account for 29.6 percent of all tribal members. There are 4,067 males and 4,039 female tribal members, of those 26.3 percent of all males are under age 19 and 29.1 percent of all females are under age 19. There are more males in each age group, with the exception of the 15 to 19 year age group where there are twice as many females than males . See Table 4.

Table 4. Single year age by gender for those aged 19 years and under

	Males		Females	
Under 5 years	321	3.4%	296	3.1%
5 to 9 years	324	3.4%	370	3.9%
10 to 14 years	306	3.2%	286	3.0%
15 to 19 years	122	1.3%	223	2.3%
Total 19 years and under	1073	11.3%	1175	12.3%

Source: ACS 2011-2015

Median Age

The median age (the point where 50% of the population are above and 50% are below) for the Colorado River Indian Tribes members is 33.9 years, with males younger at 36.8 years and females at 41.4 years. The median age of tribal members is the same as the State (37 years of age) and lower than the County 54.8 years. This once more serves to emphasize the overall young age of tribal members. See Figure 4.

Figure 4. Median Age in Years 2015

Race

The largest cohort of Colorado River Indian Tribes members identify themselves as White alone (44.6%) followed by American Indian or Alaska Native alone (33.9%), while the remaining 21.5 percent are split between some other race alone, and two or more races. This stands in strong contrast to the State which is 78 percent white alone, and the County which is 74 percent white alone. See Table 6.

Table 6. Race

	Arizona		La Paz County		Colorado River Indian Tribes	
One race	6,430,083	96.8%	19,928	98.0%	9,515	95.3%

Two or more races	211,845	3.2%	407	2.0%	437	4.7%

Source: ACS 2011-2015

Ethnicity

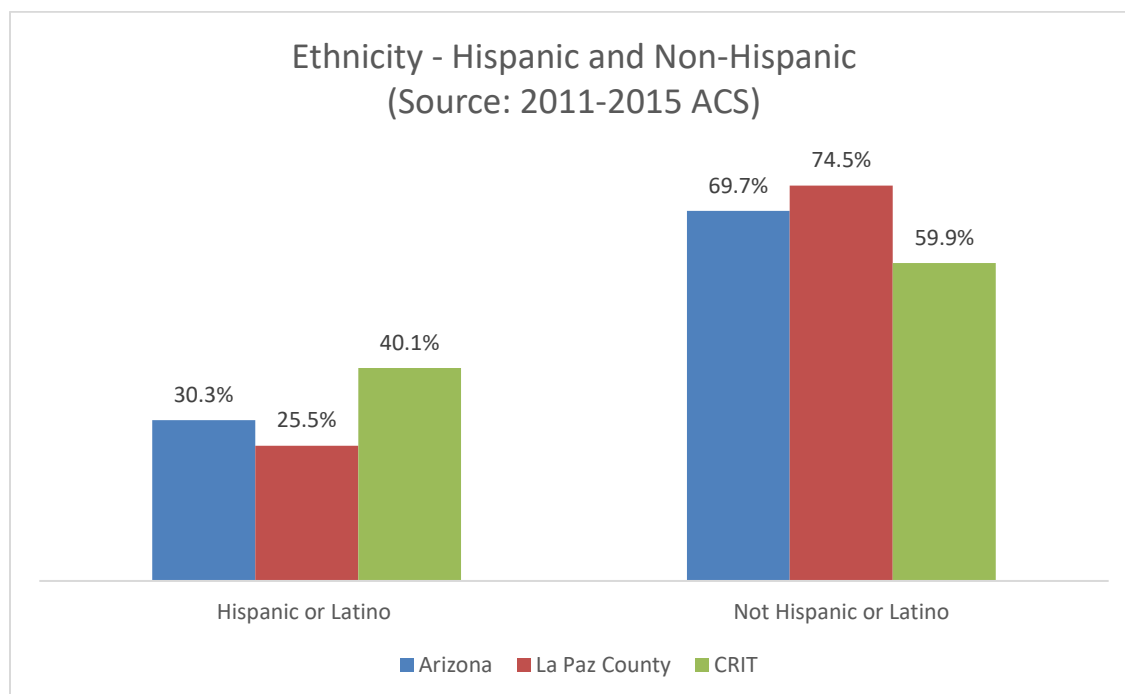

In terms of ethnicity, two-fifths (40.1%) of Colorado River Indian Tribes members identify themselves as Hispanic or Latino. This is higher than the surrounding County where one-third (25.5%) identify themselves as Hispanic or Latino and higher than the State where 30.3 percent identify themselves as Hispanic or Latino. See Table 7, and Figure 5.

Source: ACS 2011-2015

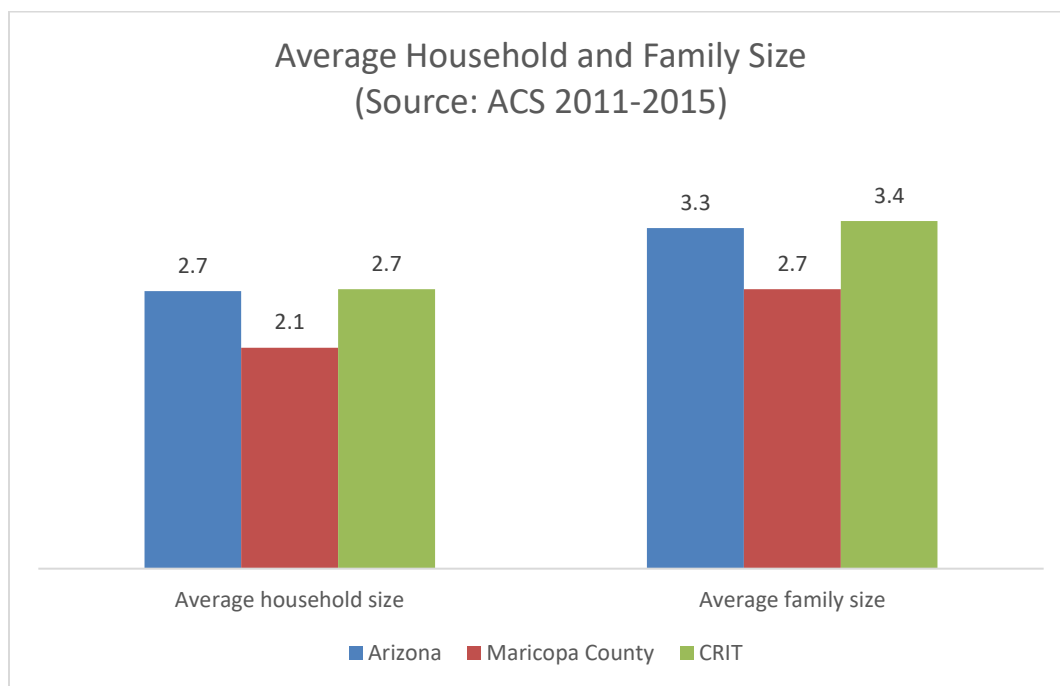

Figure 5. Ethnicity

Household Size

In 2011-2015, there were 2,891 households on the Colorado River Indian Tribes, with an average household size of 2.7 persons and an average family size of 3.4 persons as well. The average household size of 2.7 persons is the same as the State average (2.7 persons) and larger than the County average (2.1 persons). The average family size for tribal members is also larger than the State and the County, where the average is 3.3 and 2.7 persons, respectively. See Figure 6.

Figure 6. Average Household and Family Size

Households

The next section of the demographic profile focuses on households and their structure. The Census defines a “household” as a person or group of people who occupy a housing unit. The “householder” is a person in whose name the housing unit is owned, being bought, or rented. A “family household” consists of a householder and one or more people living together in the same household who are related to the householder by birth, marriage, or adoption — it may also include people unrelated to the householder. If the householder is married and living with his/her spouse, then the household is designated a “married-couple household.” The remaining types of family households not maintained by a married couple are designated by the sex of the householder. A “nonfamily household” consists of a person living alone or a householder who shares the home with nonrelatives only; for example, with roommates or an unmarried partner.

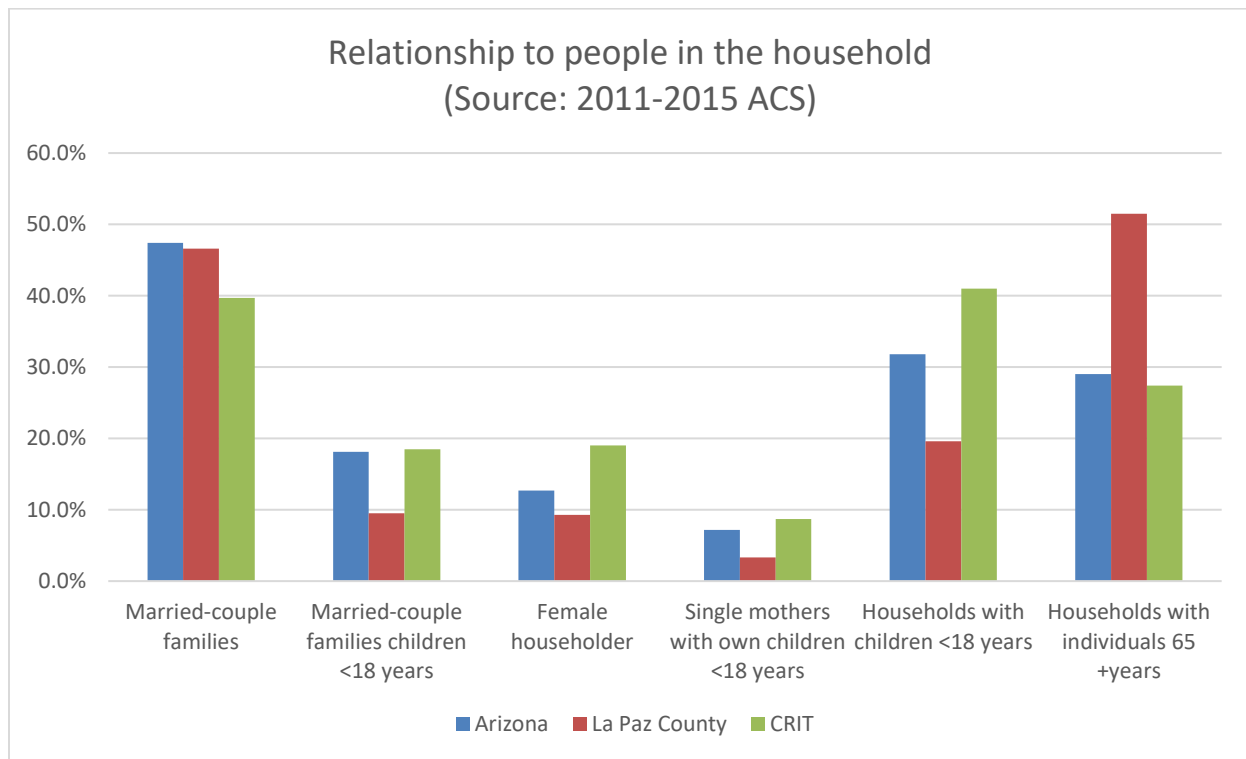

Family households (66.2%) predominate in the Colorado River Indian Tribes, although traditional married couple families are in the minority (39.7%), at rates lower than the State (47.4%) or the County (46.6%). Households headed by a female head of household (single moms) account for one-third (19.0%) of all households. Half, (58.7%) of all households are either married couple families (39.7%) or households headed by single mothers (19.0%). See Table 8 and Figure 7.

Table 8. Household Relationships

Average family size	3.3		2.7		3.4	

Source: ACS 2011-2015

Figure 7. Household Relationships

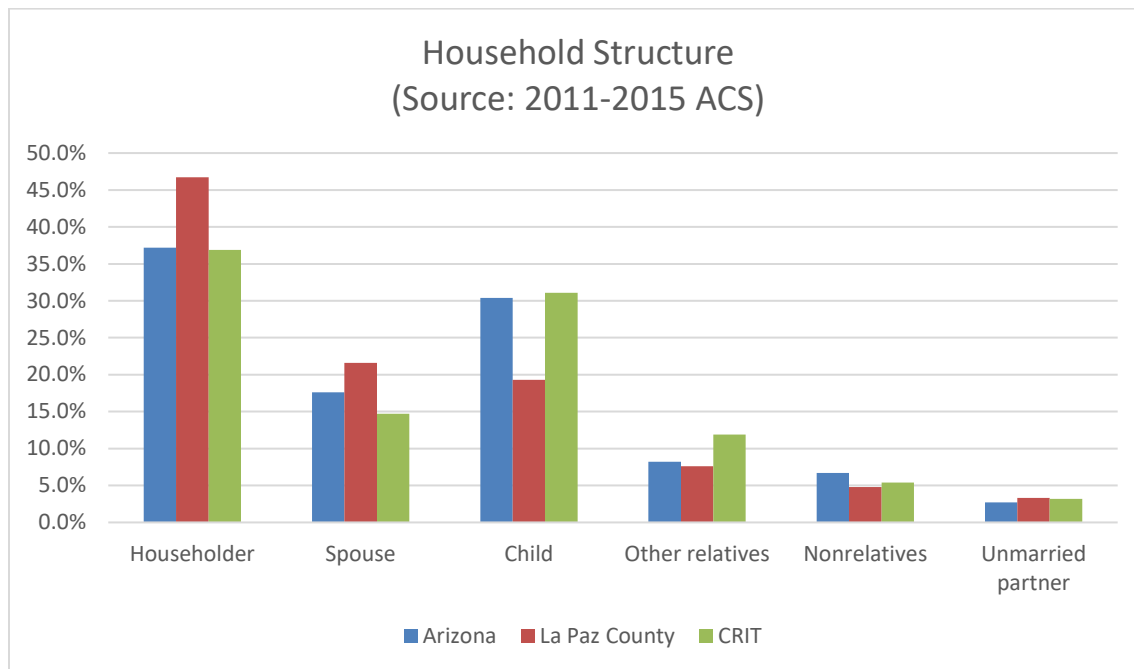

In terms of household characteristics 36.9 percent of all households are headed by a householder, almost the same as the State where 37.2 percent of households are headed by a householder and lower than the County where 46.7 percent of households are headed by a householder. Spouse headed households comprise a minority of Colorado River Indian Tribes tribal households (14.7%) less than the State (17.6%) or the County (21.6%). Children comprise more than one-third of all households (31.1%), slightly more than the State (30.4%) and far larger than the County (19.3%). Households on the Colorado River Indian Tribes are more likely to contain other relatives (11.9%) than the State (8.2%) or the County (7.6%). See Table 9 and Figure 8.

Table 9. Household Structure

	Arizona		La Paz County		Colorado River Indian Tribes	
Householder	2,412,212	37.2%	9,365	46.7%	2,891	36.9%
Spouse	1,141,965	17.6%	4,320	21.6%	1,155	14.7%
Child	1,970,330	30.4%	3,877	19.3%	2,443	31.1%

Unmarried partner	173,826	2.7%	655	3.3%	254	3.2%

Source: ACS 2011-2015

Figure 8. Household Structure

Family households dominate among Colorado River Indian Tribes members (66.2%), at a slightly lower rate than the State (65.6%) and the County (60.5%). Non-family households (14.8%) account for more than one-tenth of Colorado River Indian Tribes households, which is lower than the State (16.8%) or County (21.6%). Husband and wife families account for almost two-fifths (39.7%) of households, whereas residents of the State (47.4%) and the County (46.6%) are more likely to live in husband and wife households. Households on the Colorado River Indian Tribes are almost two times more likely to be headed by a female householder (19%) with no husband present, than the State (12.7%) or the County (9.3%) where single mother households are less prevalent. Households on the Colorado River Indian Tribes are more likely (41.0%) to have children under the age of 18 living in the household, than the State (31.8%) and the County (19.6%). See Table 10, and Figure 9.

Children Under 18 Years Age Living with Grandparent

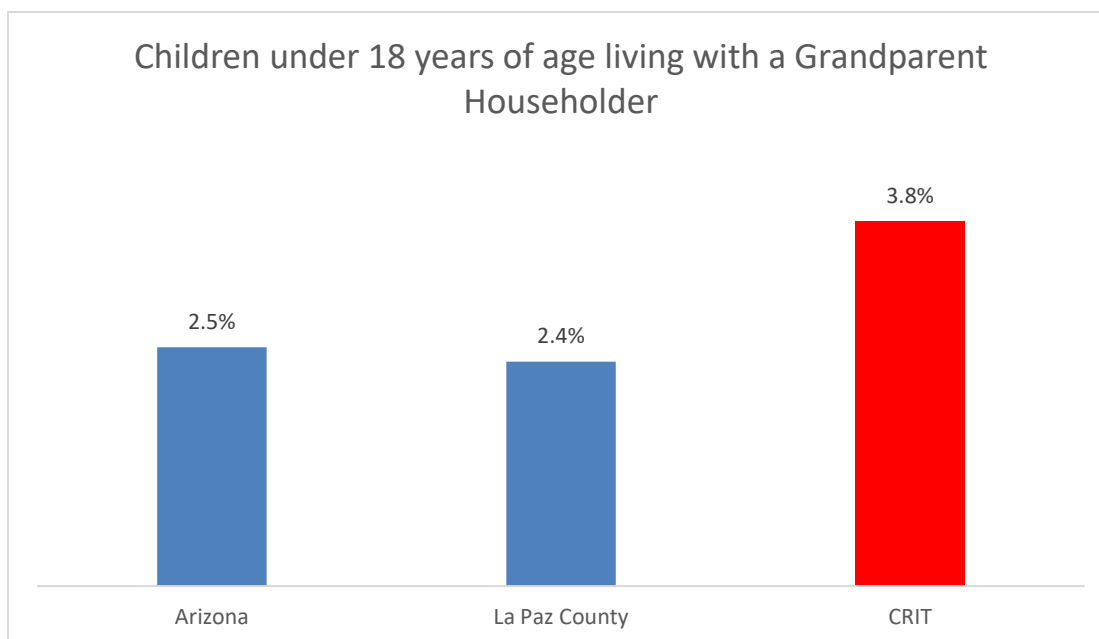

Children under age 18 on the Colorado River Indian Tribes are almost twice as likely to live with grandparents (3.8%) as they are at the State (2.5%) or County level (2.4%). There are a number of differences between the proportions of children by age living with grandparents. Four-fifths of all grandchildren (86.6%) cared for by grandparents are aged 5 or older, potentially placing a greater burden of support on the grandparents. See Table 11 and Figure 10.

Table 11. Children under 18 years of age living with a grandparent householder

	Arizona		La Paz County		Colorado River Indian Tribes

Figure 10. Percentage of children under 18 living with a grandparent householder

Household Income

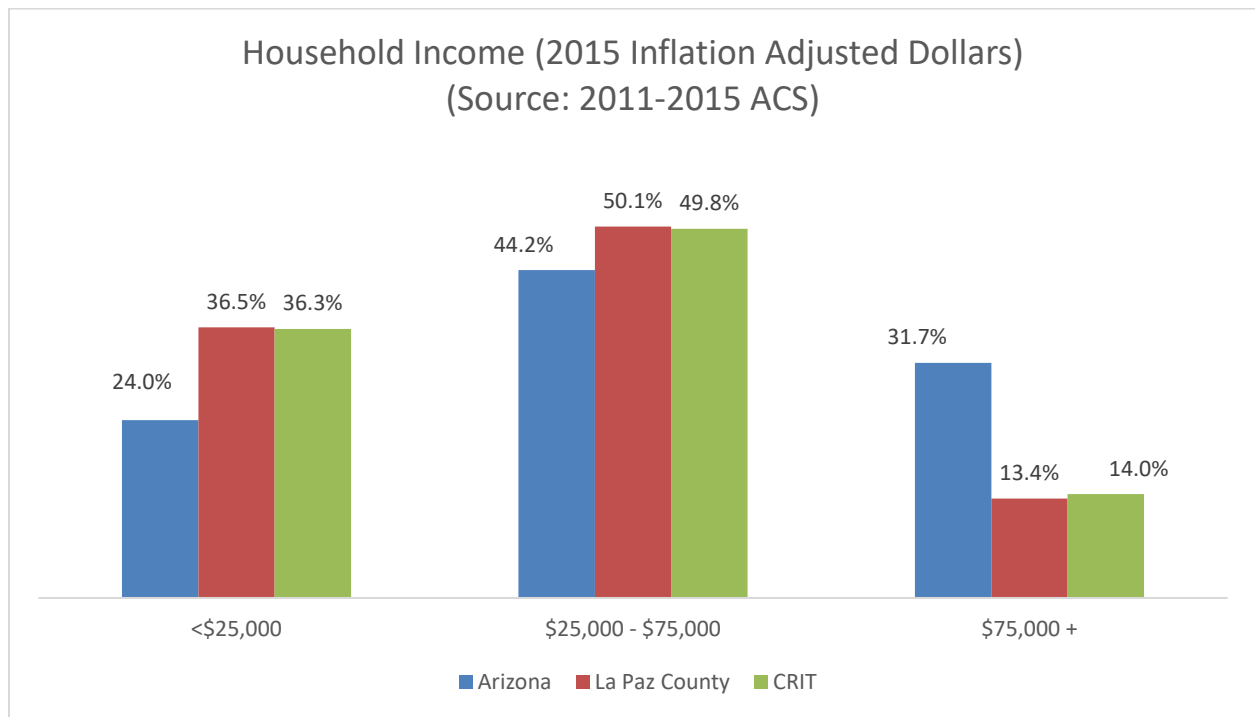

The median household income for the Colorado River Indian Tribes is \$32,834, less than both the County (\$34,466) and the State (\$50,255). Tribal members are more likely to have lower household incomes than either the State or the County. Income patterns for households making less than \$25,000 are closer for the Tribe (36.3%) and the County(36.5%) than for the State (24.0%). A similar pattern exists for tribal members (49.8%) and County residents (50.1%) making between \$25,000 and \$74,999, while the State (44.2%) is lower. Correspondingly, tribal households are half as likely (14.0%) to have incomes over \$75,000 as are County residents (13.4%), while the State (31.7%) rate is at least double the tribes and the counties. See Table 12, and Figure 11.

Table 12. Household Income (In 2015 Inflation-Adjusted Dollars)

Figure 11. Percentage of household income by range

Supplemental Income

Households on the Colorado River Indian Tribes are twice as likely to receive Food Stamps (27%) than are residents of the State (14%) and the County (16%). They are more likely (4%) to receive public assistance income than the State (2%) or the County (2%). They also tend to have fewer households with retirement income (14%) than the State at large (20%) and the County (27%) which has more retirees than both the state and the tribe. See Table 13 and Figure 12.

Poverty

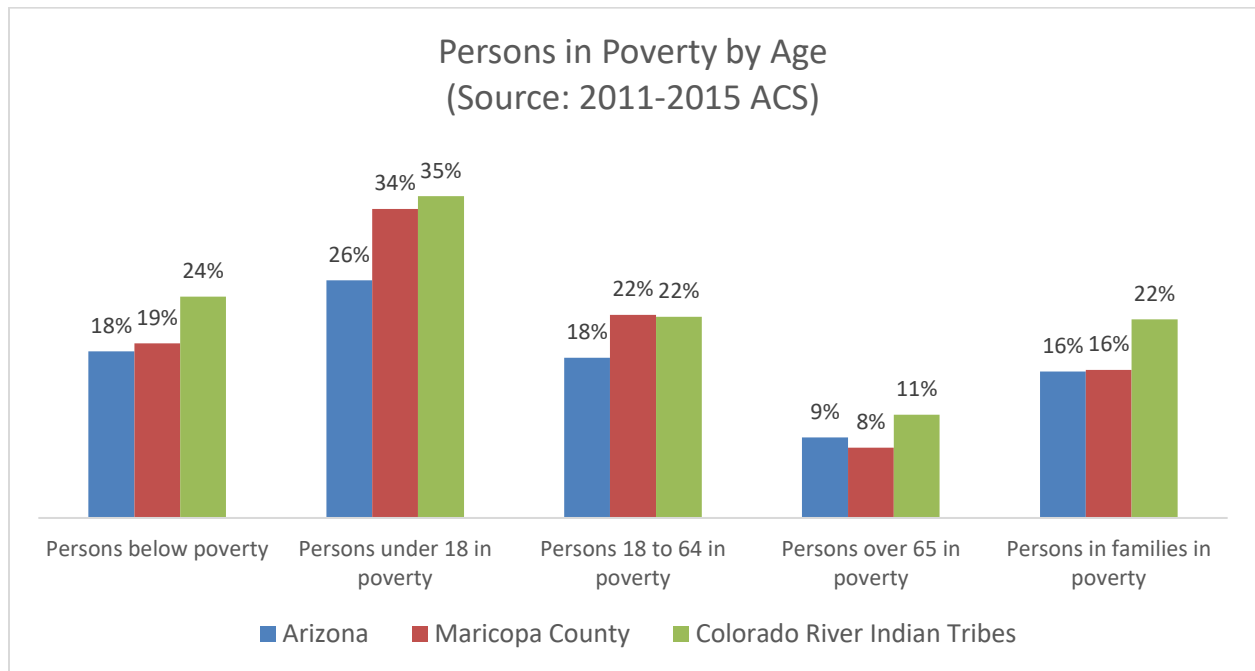

Poverty rates for the Colorado River Indian Tribes (24%) are slightly higher than the State (18%) and the County (19%). Almost half of children under 18 years of age (35%) are considered to be living in poverty, while 22 percent of those between 18 and 64 also live in poverty. More tribal members over 65 years of age (11%) live in poverty, greater than the State (9%) and the County (8%). Correspondingly high numbers of families (19%) live in poverty. See Table 15 and Figure 13.

Figure 13. Persons in Poverty by Age

Children in Poverty

The rates of children under 18 years of age living in poverty are higher for the tribe (33%) than for the State (30%) or the County (27%). In all cases the largest proportion of children living in poverty is for 5 to 11 age group (16.5%), where the tribes is higher than the State (14.1%) or the County (13.4%). ACS Table B17001 was used to create this table. See Table 16.

Table 16. Poverty Status over the Last 12 Months - Children in Poverty

	Arizona		La Paz County		Colorado River Indian Tribes	
Persons for whom poverty is determined	6,488,917		20,073		9,275

Persons in Poverty

The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is poor. If a family's income is less than a family's threshold, then that family and every individual in it, is considered poor. Further the ratio of income to poverty can be used to measure the degree or depth of poverty. The ratio of income to poverty compares a person's income with their poverty threshold, and expresses the comparison as a fraction. For example, a poverty ratio of 1.0 (income at 100% of poverty level) means a person is living right at the poverty line; a ratio of 0.5 (income at 50% of poverty level) would mean that a person is living in a household making only half the income designated as the poverty threshold. The Census Bureau describes those with family incomes below one half of their poverty threshold as being "severely poor." People with incomes at or above their threshold but below 125 percent of their threshold are classified as "near poor."

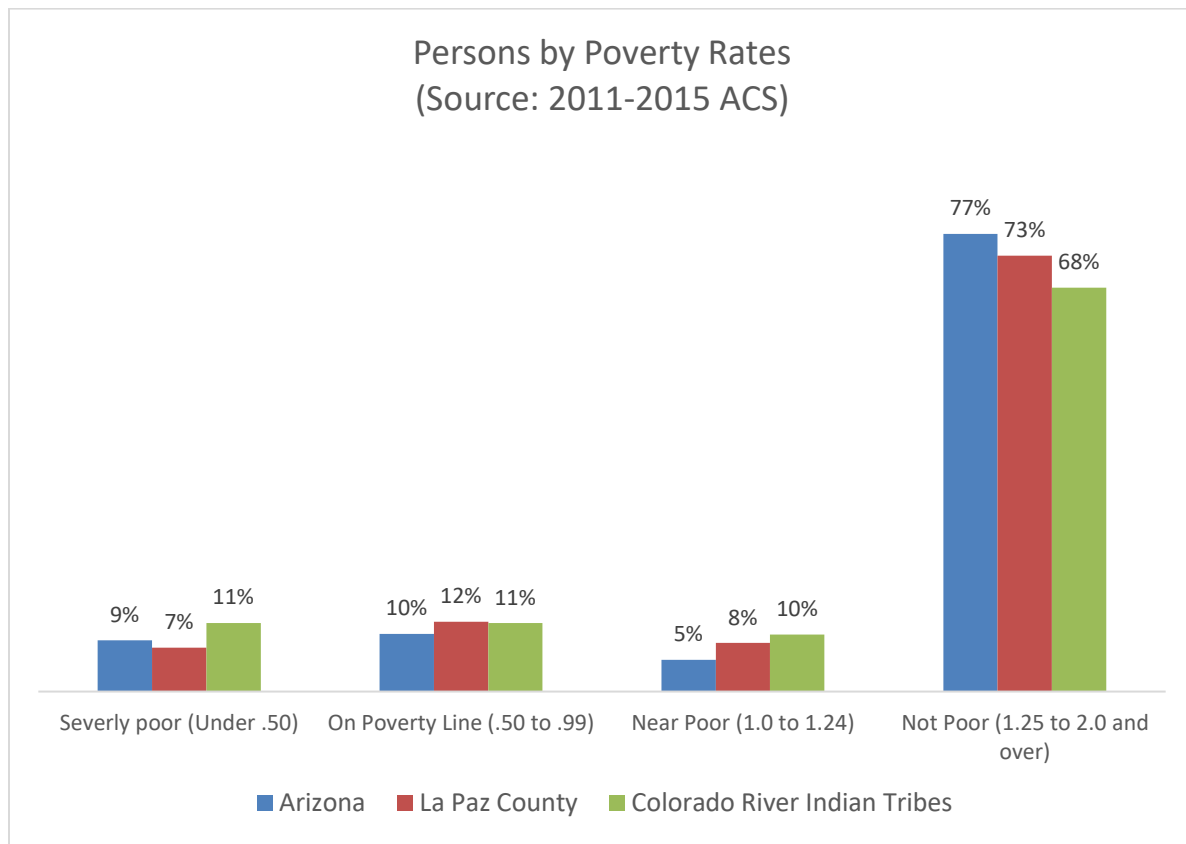

One-fifth (22%) of those living on Colorado River Indian Tribes are classified as "severely poor," with poverty ratios that ranges from below 0.5 to .99. These rates are higher than those of the State (19%) and the County (19%). A further 10 percent of tribal members are classified as "near poor" with poverty ratios between 1.00 and 1.24. These data indicate that 32 percent of the Colorado River Indian Tribes households are living in poverty, while the remaining 68 percent are classified as not living in poverty. See Table 17 and Figure 14. ACS Table C17002 was used to create this table.

Figure 14. Population by Poverty Ratios

Households Receiving Supplemental Nutrition Assistance Program (SNAP)

One-fifth (22.9%) of all households on the Colorado River Indian Tribes receive assistance from the Supplemental Nutrition Assistance Program (SNAP). This rate is higher than the State (13.5%) and the County (15.5%). Less than one-tenth of households receiving SNAP assistance (6.7%) have at least one person in the household over 60 years of age. This rate is twice as high as the State (3.5%) and higher than the County (4.6%). See Table 18. ACS Table S2201 was used to create this table.

Table 18. Households Receiving SNAP Assistance

	Arizona	La Paz County	Colorado River Indian Tribes

Fertility

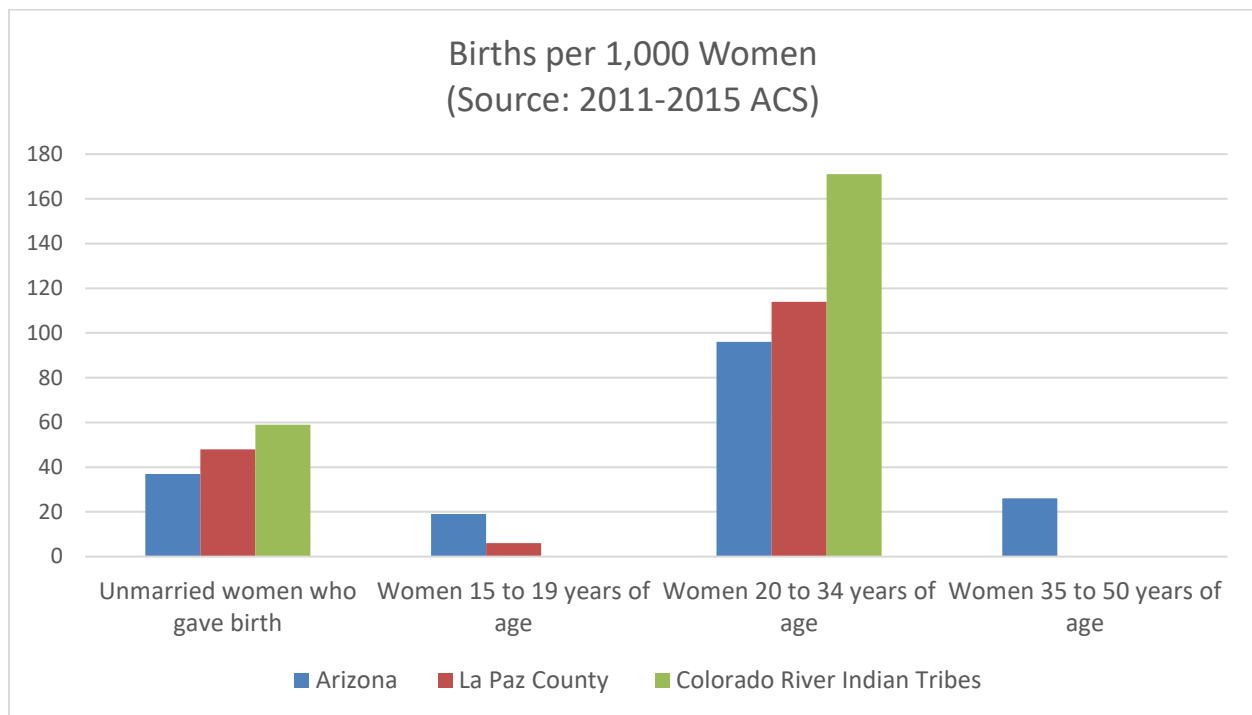

Birth rates for women between the ages of 15 and 50 years on the Colorado River Indian Tribes (6.6%) are similar to the State (5.4%) and County (4.7%). The proportion of unmarried women giving birth on the Colorado River Indian Tribes (5.9%) is higher than the State (3.7%) and the County (4.8%). See Table 19 and Figure 15.

Figure 15. Births per-1000 Women

These data provide a snapshot in time for the Colorado River Indian Tribes, primarily the status of the population at the time of the 2011-2015 American Community Survey estimates for the period.

APPENDIX A:
THE COLORADO RIVER INDIAN TRIBES AMERICAN COMMUNITY SURVEY 2011-
2015, 5-YEAR ESTIMATES MARGIN OF ERROR ESTIMATES

ACS Margin of Error Estimates

The ACS estimates are based on data from a sample of housing units and people in the population, not the full populations. For this reason, ACS estimates have a degree of uncertainty associated with them, called sampling error. In general, the larger the sample, the smaller the level of sampling error. The ACS calculates standard errors for each estimate produced and publishes the 90 percent confidence level margins of error (the Census Bureau standard). You can be 90 percent confident that the interval within the margin of error from the estimate includes the true value. Users can add and subtract the margin of error value from the estimate to find the top and bottom of the range within which the ACS is 90 percent confident that their estimate lies in.

Understanding margin of error

A term you will often come across in survey research is "within the margin of error." Most people hear the term frequently during election season when results from polls are reported. Many surveys and polls collect data from a representative sample of a population to make determinations about a larger population. Results would be somewhat different each time the survey is administered to a different representative sample. The margin of error accounts for these differences by calculating an upper and lower boundary the true result would likely fall between if every member of population was surveyed.

For example, in the case of Colorado River Indian Tribes the ACS has established that there are 8,106 persons present in the Colorado River Indian Tribes. The survey also indicates that there are 4,067 males and 4,039 females in the total population, with a margin of error of plus or minus (\pm) 303 males and (\pm) 258 females. See Table 2 margin of error estimates. The margin of error tells us that if the same survey were administered to the Colorado River Indian Tribes' members again, it is highly probable that the true population for males would be between 3,764 and 4,370 males and similarly that the true population of females would be between 3,781 and 4,297.
