Fort Mojave Indian Tribe

Demographic Analysis

Introduction

This analysis of the Fort Mojave Indian Tribe was undertaken by the Arizona Rural Policy Institute (ARPI) a unit of the Center for Business Outreach in the W.A. Franke College of Business at Northern Arizona University for the planning department of the Fort Mojave Indian Tribe. The ARPI has produced the Demographic Profile for the Fort Mojave Indian Tribe, with the latest information available from the 2015 American Community Survey (5-year estimates) American Indian and Alaska Native Tables. This document is provided to Arizona tribes as a product of the EDA University Center Grant provided by the EDA to the Center for Business Outreach at Northern Arizona University.

Since 2010 the American Community Survey (ACS) has been tasked with producing population, demographic and housing unit estimates for the United States on an annual and 5 year series basis. This analysis is entirely based the American Community Survey, 5-year estimate data for the period 2011 to 2015 and is annotated in the document as ACS 2015 (5-year estimates). The 2015 ACS 5-year estimates are based on data collected between January 2011 and December 2015. The data were used to analyze household income, poverty rates, employment, language use and household characteristics for Fort Mojave Indian Tribe. Only the 5-year estimates are used as this is the only data that is provided for small population areas, the 5 year data represent the average characteristics over the 5-year period.

Demographic characteristics are outlined by three separate levels, the State of Arizona, Mohave County and the Fort Mojave Indian Tribe. Comparisons between the State of Arizona, and Mohave County serves to provide further levels of comparison when examining demographic characteristics of the tribe. The Fort Mojave Indian Tribe Reservation is located in Mohave County, Arizona, San Bernardino County, California and Clark County, Nevada. Since 57% of the Fort Mojave Indian Tribe's lands are located in Mohave County it was chosen for comparison purposes.

Appendix A contains the margin of error estimates to be used to calculate the range of estimates for the American Community Survey data.

Population

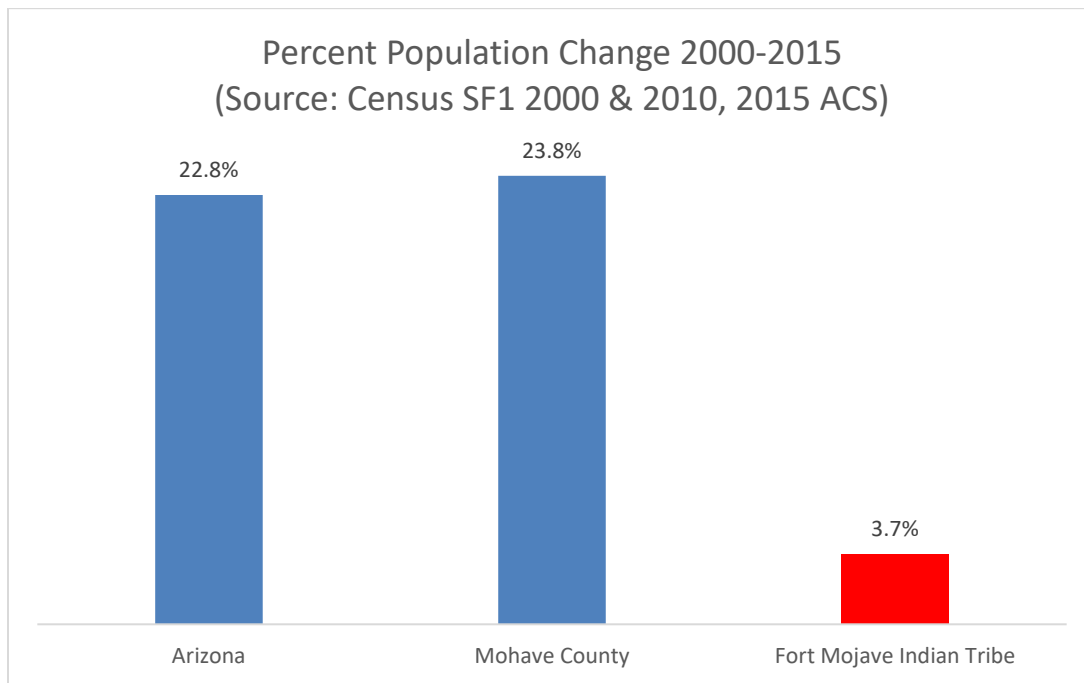

The Fort Mojave Indian Tribe population has increased steadily, gaining 3.7 percent of population between the last census in 2010 and 2015. The population increased at a 49.1% rate between the 2000 and 2010 census. The 2010 SF1 census is considered the official count, and accounts for only the population within the exterior boundaries of the Fort Mojave Indian Tribe. The rate of population growth is less than both the State and the County. This rate, however, reflects growth by birthrate alone and not growth through in-migration as is the case with both the State and the County. Outmigration to border communities, other counties and states for employment also impacts the population count as only on-reservation populations are counted.

Table 1. Total Population & Trends

Total Population and Trends	Arizona	Mohave County	Fort Mojave Indian Tribe
Total Population 2000	5,130,632	155,032	1,043
Total Population 2010	6,392,017	200,186	1,477
Total Population 2011-2015	6,641,928	203,362	1,613
Change in Population 2000-2015	22.8%	23.8%	35.3%

Source: Census 2000, 2010 SF1, ACS 2015 (5 year estimates)

Figure 1. Percent Population Change 2000 to 2015 Fort Mojave Indian Tribe

Gender

There are more females (50.7%) than males (49.3%) in the Fort Mojave Indian Tribe. The gender ratios in the Fort Mojave Indian Tribe are opposite to the County ratios where there are slightly more males 50.3% respectively than females 49.7% respectively. See Table 2.

Table 2. Gender Ratios

	Arizona	Mohave County	Fort Mojave Indian Tribe
Male	3,299,088	102,371	796
Female	3,342,840	100,991	817

Source: ACS 2011-2015

Age

The Fort Mojave Indian Tribe is dominated by tribal members who are 65 years or older. The over 65 year age population accounts for one-third (33.4%) of all tribal members, twice as large as the State (15.4%) and Mohave County (25.9%). The fact that one-third of the tribe is 65 years or older carries with it some fairly important policy implications. The large portion of older tribal members influences the provision of health and social services and impacts the available workforce issues. Such a large proportion of older tribal members is an anomaly in Arizona, where tribes tend to be dominated by younger members, those under age 20.

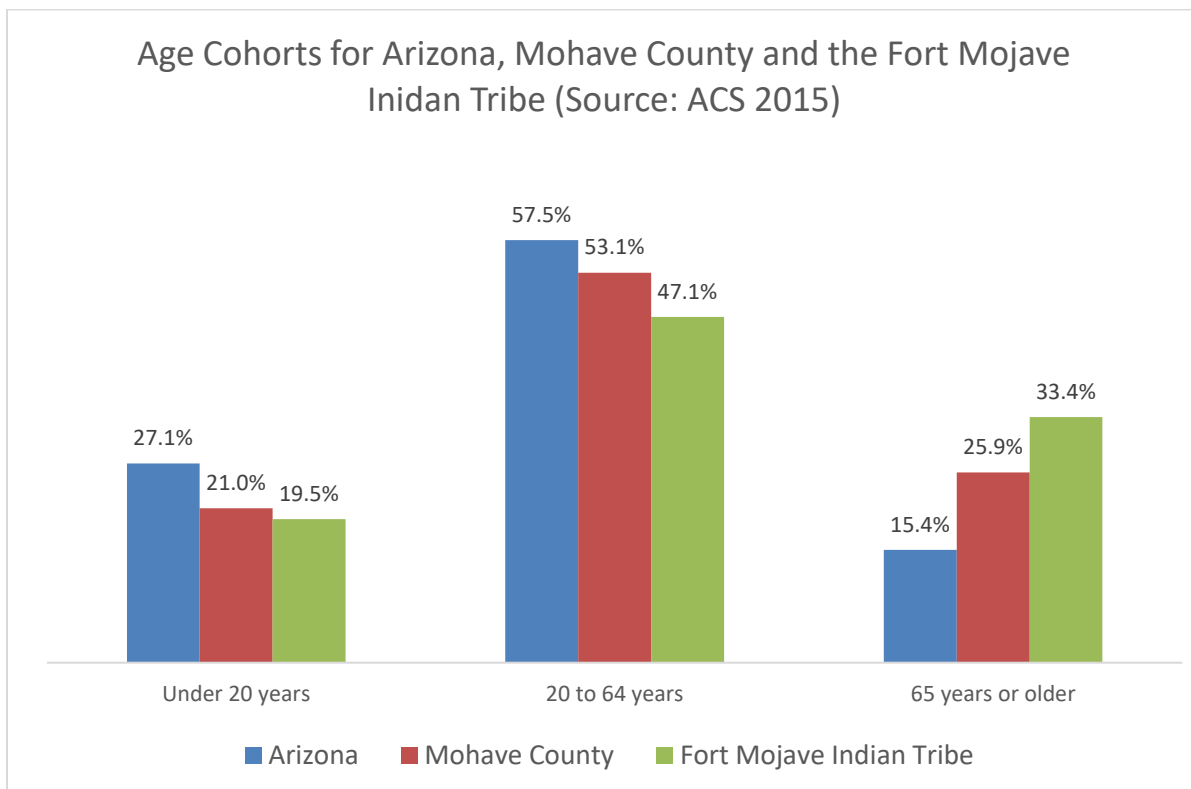

The under 20 year age group (19.5%) accounts for a smaller proportion than the State (27.1%) and the County (21.0%). Finally, those age 20 to 64 years account for 47.1 percent of the tribal members, which is lower than the State (57.5%) or the County (53.1%). The large number of older tribal members will have a potentially negative effect on the development of the tribal workforce in the future. See Table 3, and Figure 2.

Table 3. Age Groups by 5 Year Cohorts

	Arizona	Mohave County	Fort Mojave Indian Tribe
Under 5 years	433,835	9,718	88
5 to 9 years	455,634	10,915	80

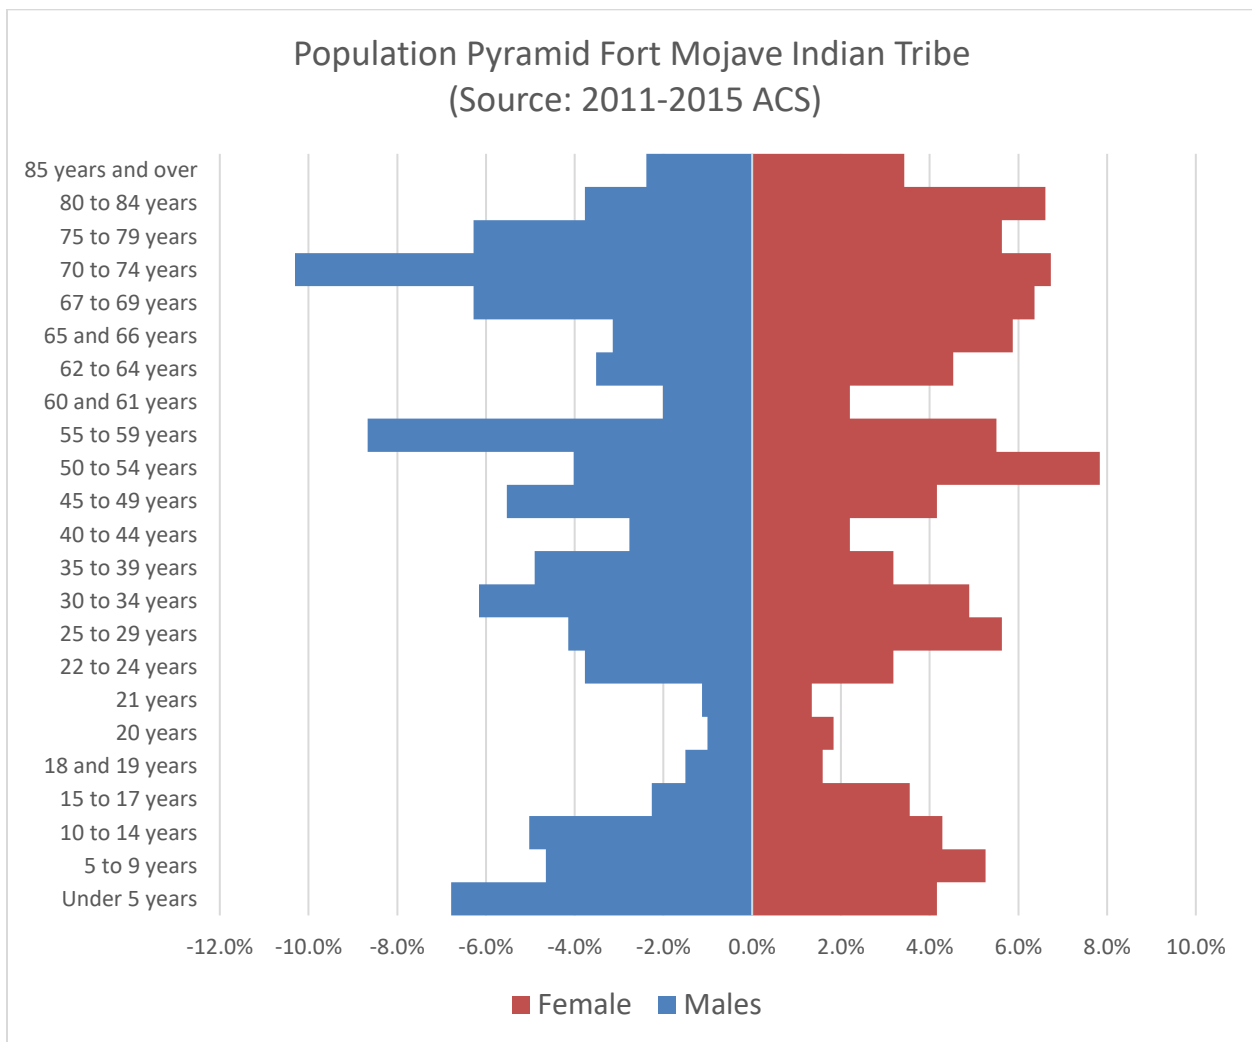

Figure 2. Age Cohorts for Arizona, Mohave County and the Fort Mojave Indian Tribe 2011-2015

A population pyramid, also called an age structure diagram, is a graphical illustration that shows the distribution of various age groups in a population (typically that of a country or region of the world), which forms the shape of a pyramid when the population is growing.

The population pyramid below (Figure 3) illustrates the difference between males and females for the 5 year age cohorts. The pyramid is not-symmetrical indicating that there are age cohort differences between males and females for the under 20 year age group. At the top of the age pyramid there are slightly more males than females. This is a demographic outlier as women tend to live longer than men. The age pyramid provides an illustrated snapshot of the age structure of the tribal members during the period 2011-2015.

Figure 3. Population Pyramid - Fort Mojave Indian Tribe 2011-2015

Population Under 20 Years

Children those under 19 years of age account for one-third (15.5%) of all tribal members. There are 115 males and 135 female children, of those 14.4 percent of all males are under age 19 and 16.5 percent of all females are under age 19. See Table 4.

Table 4. Single year age by gender for those aged 19 years and under

	Males		Females	
	Count	Percentage	Count	Percentage
Under 5 years	37	32.2%	43	31.9%
5 to 9 years	40	34.8%	35	25.9%
10 to 14 years	18	15.7%	29	21.5%
15 to 19 years	20	17.4%	28	20.7%
Total 19 years and under	115	14.4%	135	16.5%

Source: ACS 2011-2015

Median Age

The median age (the point where 50% of the population are above and 50% are below) for the Fort Mojave Indian Tribe tribal members is 53.1 years, with males younger at 51.8 years and females at 53.8 years. The median age of tribal members is higher than the State (36.8 years of age) and the County 51.3 years. This serves once more to emphasize the overall older age of tribal members. See Figure 4.

Race

Surprisingly, the majority of Fort Mojave Indian Tribe tribal members identify themselves as White alone (52.6%), followed by American Indian or Alaska Native alone (40.9%), while the remaining 6.5 percent are split between some other race or two or more races. This stands in strong contrast to the State which is 78.4 percent white alone, and the County which is 89.0 percent white alone. See Table 6.

Table 6. Race

	Arizona		Mohave County		Fort Mojave Indian Tribe	
One race	6,430,083	96.8%	196,359	96.6%	1,546	95.8%

Two or more races	211,845	3.2%	7,003	3.4%	0	0.0%

Source: ACS 2011-2015

Ethnicity

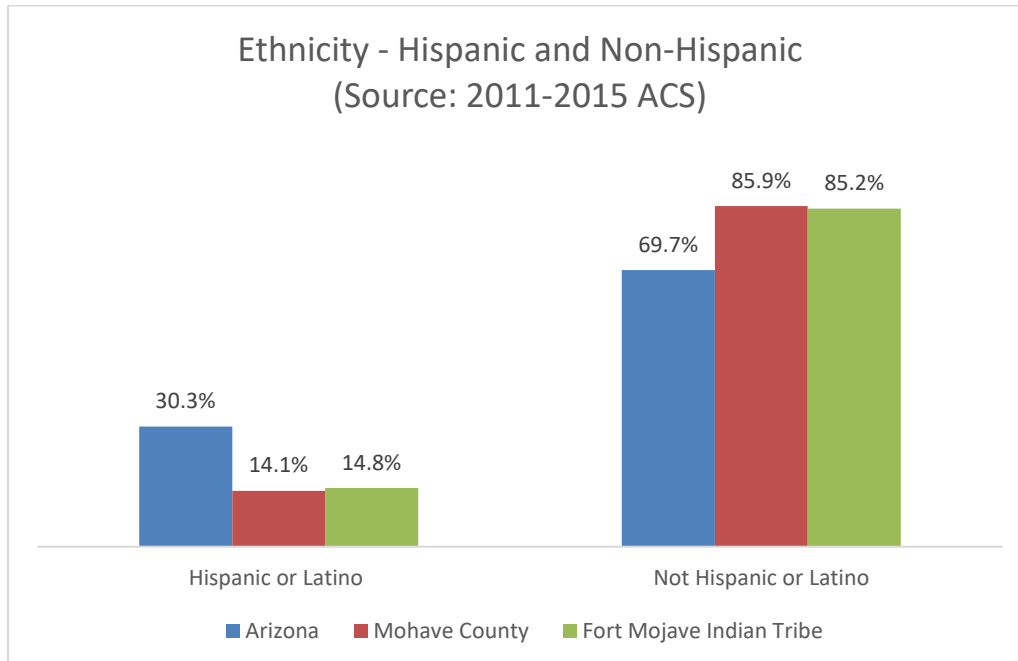

In terms of ethnicity, almost one-fifth (18.6%) of Fort Mojave Indian tribal members identify themselves as Hispanic or Latino. This is higher than the surrounding County where more than one-tenth (14.1%) identify themselves as Hispanic or Latino and lower than the State where 30.3 percent self-identify as Hispanic or Latino. See Table 7, and Figure 5.

Table 7. Ethnicity

Source: ACS 2011-2015

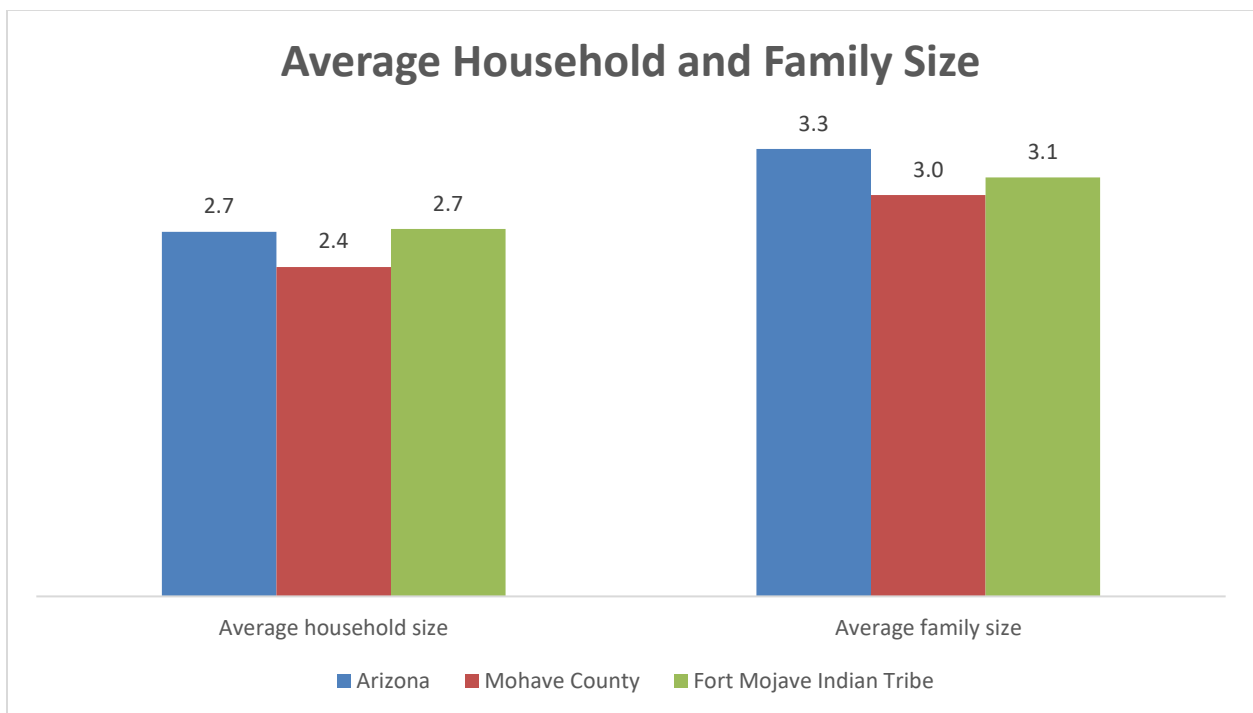

Figure 5. Ethnicity

Household Size

In 2011-2015, there were 629 households on the Fort Mojave Indian Tribe, with an average household size of 2.7 persons and an average family size of 3.1 persons. The average household size of 2.7 persons is the same as the State average (2.7 persons) and higher than the County average (2.4 persons). The average family size for tribal members (3.1 persons) is smaller than the State and larger than the County, where the average is 3.3 and 3.0 persons, respectively. See Figure 6.

Figure 6. Average Household and Family Size

Households

The next section of the demographic profile focuses on households and their structure. The Census defines a “household” as a person or group of people who occupy a housing unit. The “householder” is a person in whose name the housing unit is owned, being bought, or rented. A “family household” consists of a householder and one or more people living together in the same household who are related to the householder by birth, marriage, or adoption — it may also include people unrelated to the householder. If the householder is married and living with his/her spouse, then the household is designated a “married-couple household.” The remaining types of family households not maintained by a married couple are designated by the sex of the householder. A “nonfamily household” consists of a person living alone or a householder who shares the home with nonrelatives only; for example, with roommates or an unmarried partner.

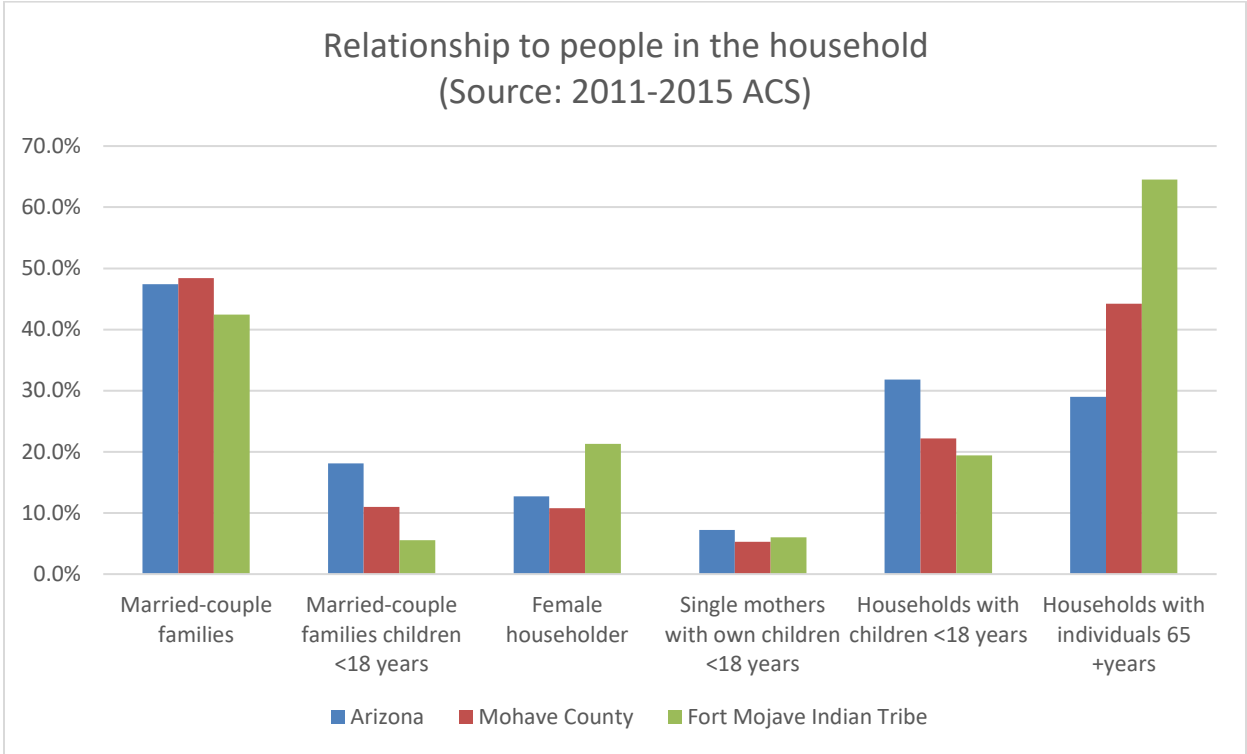

Family households (76.1%) predominate in the Fort Mojave Indian Tribe, traditional married couple families are the majority (35.8%), at rates lower than both the State (47.4%) or the County (50.7%). Households headed by a female head of household (single mothers) account for one-third (34.9%) of all households. Almost three-fourths (70.7%) of all households are either married couple families (35.8%) or households headed by single mothers (34.9%). See Table 8 and Figure 7.

Table 8. Household Relationships

Source: ACS 2011-2015

Figure 7. Household Relationships

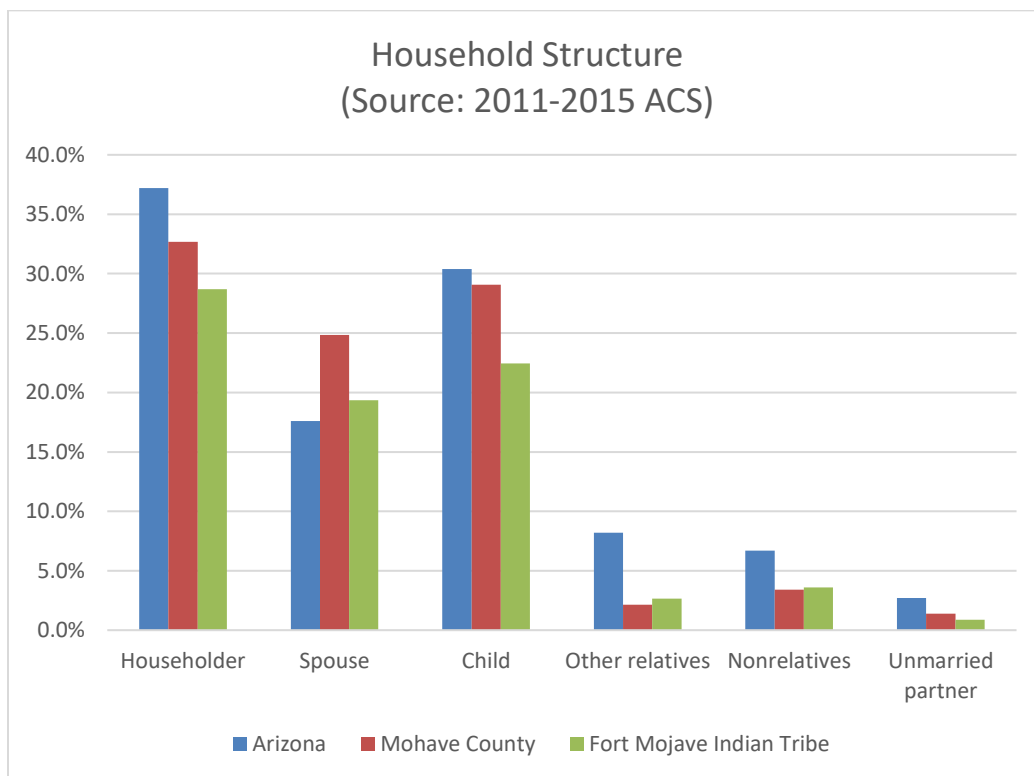

In terms of household characteristics 28.7 percent of all households on the Fort Mojave Indian Tribe are headed by a householder, lower than the State (37.2%) and the County (32.7%). Spouse headed households comprise one-fifth of Fort Mojave Indian Tribe’s households (19.3%) more than the State (17.6%) and less than the County (22.4%). Children comprise more than one-fifth of all households (22.4%), less than the State (30.4%) and the County (29.1%). Households on the Fort Mojave Indian Tribe are less likely to contain other relatives (2.7%) than the State (8.2%) and at the same rate as the County (2.7%). See Table 9 and Figure 8.

Table 9. Household Structure

	Arizona		Mohave County		Fort Mojave Indian Tribe	
Householder	2,412,212	37.2%	51,465	32.7%	463	28.7%

Unmarried partner	173,826	2.7%	2,204	1.4%	14	0.9%

Source: ACS 2011-2015

Figure 8. Household Structure

Family households dominate among Fort Mojave Indian Tribe tribal members (81.7%), at a higher rate than the State (65.6 %) or the County (63.4%). Non-family households (14.5%) account for more than one-tenth of Fort Mojave Indian tribal member households, less than both the State (16.8%) or County (19.7%). Husband and wife families account for more than half (59.8%) of households, whereas residents of the State (47.4%) and the County (50.7%) are less likely to live in husband and wife households. Households on the Fort Mojave Indian Tribe are more likely to be headed by a female householder (17.6%) with no husband present than the State (12.7%) or County (9.4%). Households on the Fort Mojave Indian Tribe are less likely (22.0%) to have children under the age of 18 living in the household, than the State (31.8%) or the County (20.7%). See Table 10, and Figure

9.

Children Under 18 Years Age Living with Grandparent

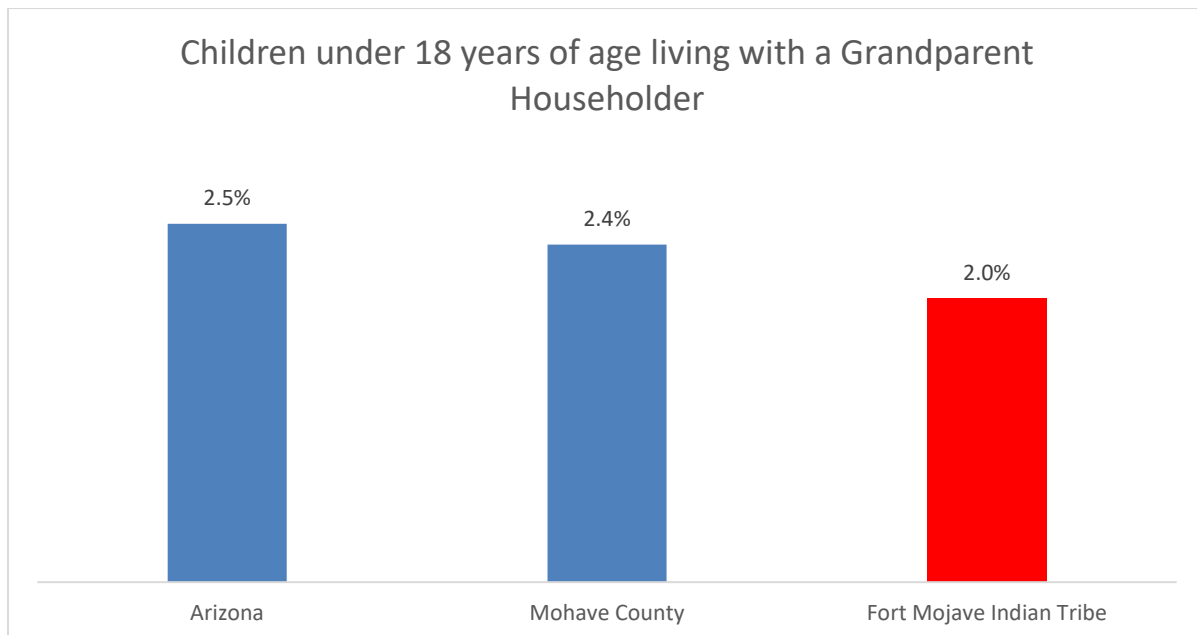

Children under age 18 are as likely to live with grandparents on the Fort Mojave Indian Tribe (2.0%) as they are at the State (2.5%) or the County (2.4%). There are a number of differences between the proportions of children by age living with grandparents. More than half of grandchildren (69.2%) cared for by grandparents are 5 years or older, potentially placing a greater burden on the grandparents. See Table 11 and Figure 10.

Table 11. Children under 18 years of age living with a grandparent householder

	Arizona		Mohave County		Fort Mojave Indian Tribe	
Grandparents living with own grandchildren under 18 years	166,232	2.5%	4795	2.4%	32	2.0%

Figure 10. Percentage of children under 18 living with a grandparent householder

Household Income

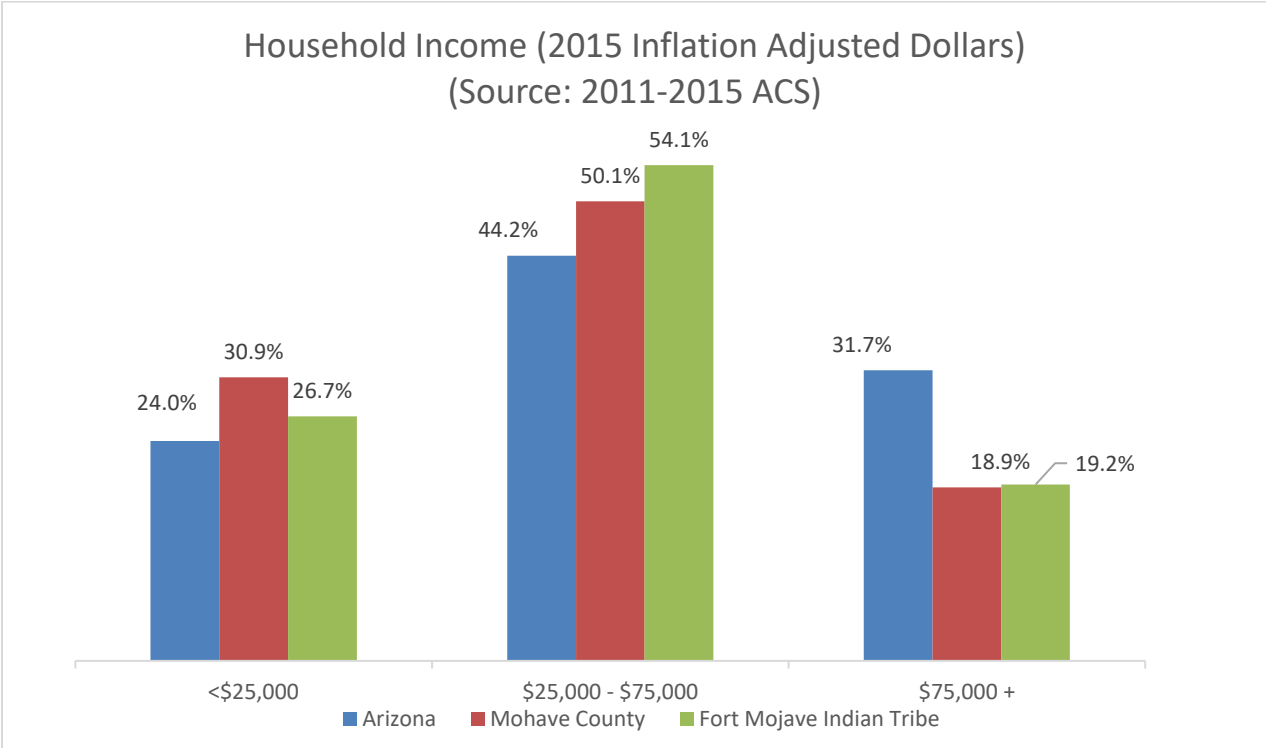

The median household income for the Fort Mojave Indian Tribe is \$49,405, more than the County (\$38,488) and the State (\$50,255). Tribal members are more likely to have lower household incomes than the State or the County. In fact households fewer households have incomes of less the \$25,000 (26.7%) than the County (30.9%), while the State (24.0%) has less. Tribal members (54.1%) are more likely than either State (44.2%) or the County (50.1%) to have household incomes between \$25,000 and \$74,999. Correspondingly, tribal households are half as likely (19.2%) to have incomes over \$75,000 than the State (31.7%) and slightly higher than the County (18.9%). See Table 12, and Figure 11.

Table 12. Household Income (In 2015 Inflation-Adjusted Dollars)

Figure 11. Percentage of household income by range

Supplemental Income

Households on the Fort Mojave Indian Tribe are less likely to receive Food Stamps (12%) than are residents of the State (14%) and the County (17%). They are more likely (3%) to receive public assistance income than the State (2%) and the same as the County (3%). They also tend to have more households with retirement income (39%) than the State at large (20%) and the County (31%). The percentage of households with retirement income is at one of the highest rates for Arizona tribal communities. See Table 13 and Figure 12.

Poverty

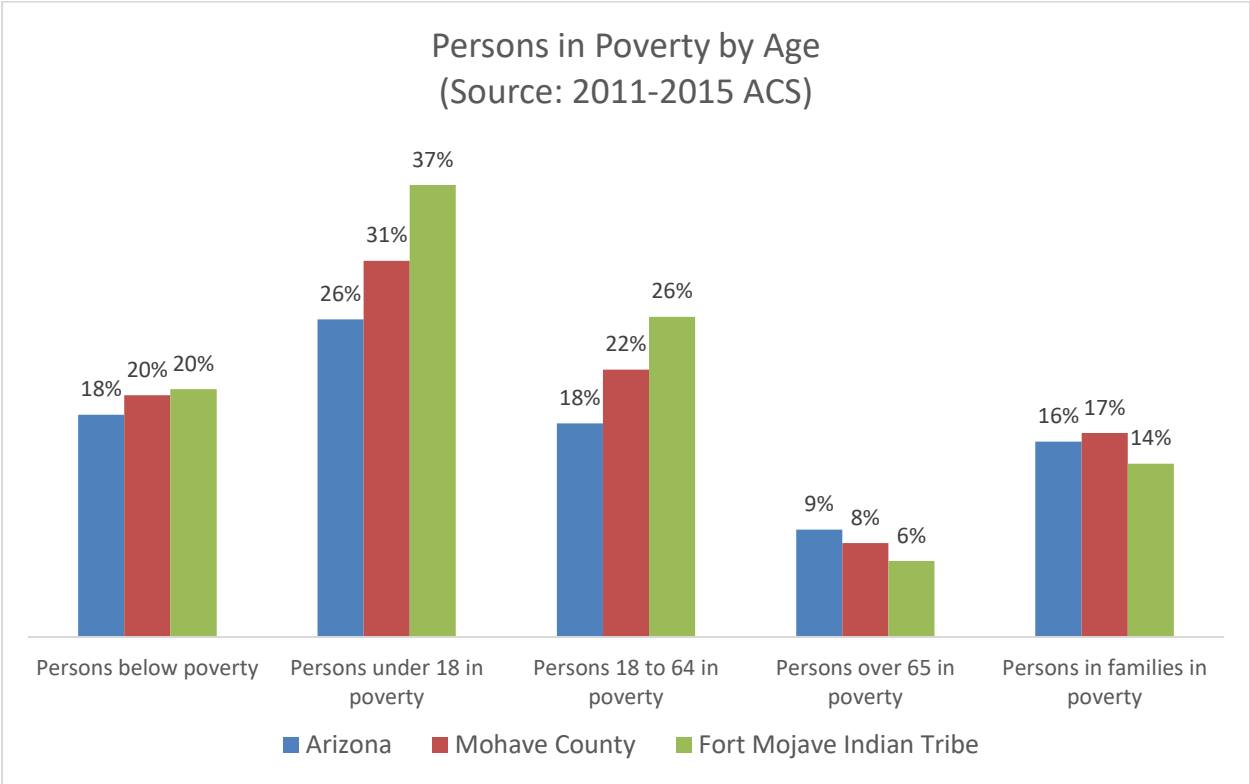

Poverty rates on the Fort Mojave Indian Tribe (20.3%) are slightly higher than the State (18.2%) and the County (19.8%) rates. More than one-third of children under 18 years of age (37.0%) are considered to be living in poverty, while more than one-fourth (26.2%) of those between 18 and 64 also live in poverty. Less than one-tenth (6.2%) of tribal members over 65 years of age live in poverty, lower than the State (8.8%) or the County (7.7%). See Table 15 and Figure 13.

Figure 13. Persons in Poverty by Age

Children in Poverty

The rates of children under 18 years of age living in poverty are higher for the tribe (37.0%) than for the State (26.0%) or the County (30.8%). In all cases the largest proportion of children under age 18 living in poverty is found in the 5 to 11 year age cohort (14.6%), where the tribe has a rate that is higher than the State and the County. ACS Table B17001 was used to create this table. See Table 16.

Table 16. Poverty Status over the Last 12 Months - Children in Poverty

	Arizona		Mohave County		Fort Mojave Indian Tribe	
Persons for whom poverty is determined	6,488,917		195,864		1,611

Source: ACS 2011-2015, Table B17001

Persons in Poverty

The Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is poor. If a family's income is less than a family's threshold, then that family and every individual in it, is considered poor. Further the ratio of income to poverty can be used to measure the degree or depth of poverty. The ratio of income to poverty compares a person's income with their poverty threshold, and expresses the comparison as a fraction. For example, a poverty ratio of 1.0 (income at 100% of poverty level) means a person is living right at the poverty line; a ratio of 0.5 (income at 50% of poverty level) would mean that a person is living in a household making only half the income designated as the poverty threshold. The Census Bureau describes those with family incomes below one half of their poverty threshold as being "severely poor." People with incomes at or above their threshold but below 125 percent of their threshold are classified as "near poor."

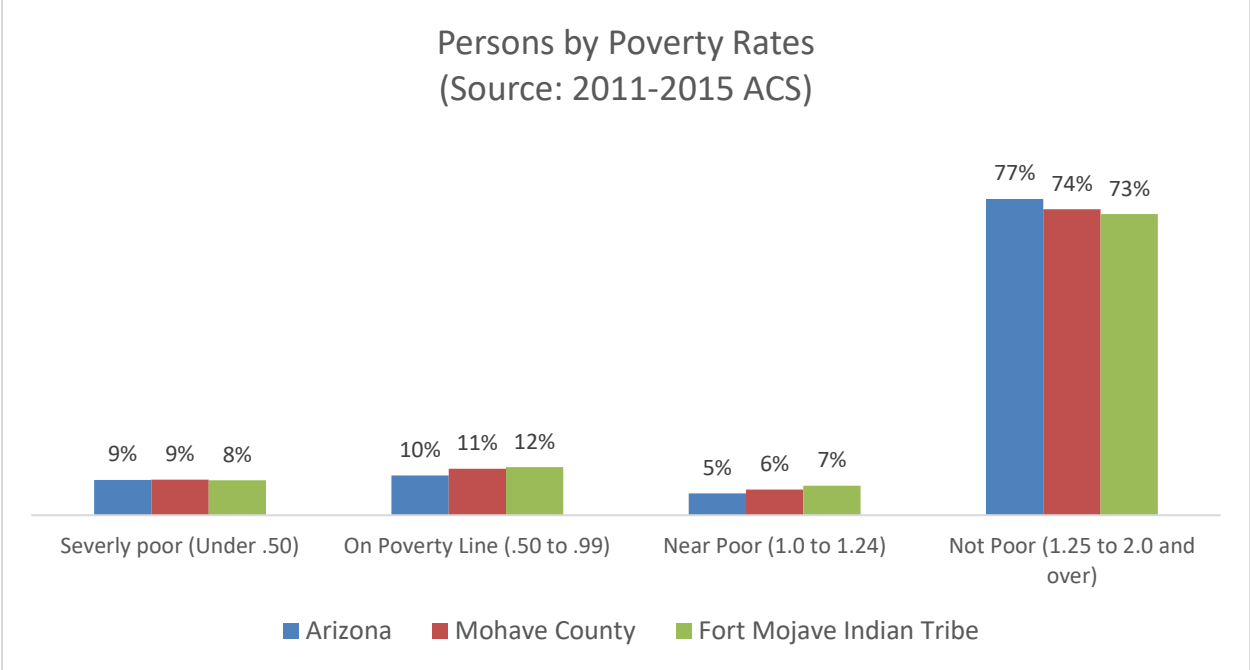

One fifth (20%) of those living on Fort Mojave Indian Tribe are classified as "severely poor," with poverty ratios that ranges from below 0.5 to .99. These rates are higher than those of the State (19%) and the County (20%). A further 7 percent of tribal members are classified as "near poor" with poverty ratios between 1.00 and 1.24. These data indicate that more than one-fourth (27%) of the Fort Mojave Indian Tribe households are living in poverty, while the remaining 73 percent are classified as not living in poverty. See Table 17 and Figure 14. ACS Table C17002 was used to create this table.

Table 17. Persons within Poverty Rates

Figure 14. Population by Poverty Ratios

Households Receiving Supplemental Nutrition Assistance Program (SNAP)

More than one-tenth of households (12.6%) on the Fort Mojave Indian Tribe receive assistance from the Supplemental Nutrition Assistance Program (SNAP). Almost one-third (41.3%) of households receiving SNAP assistance have at least one person over age 60 in the household, higher than the state (26.1%) and the county (36.2%). See Table 18. ACS Table S2201 was used to create this table.

Table 18. Households Receiving SNAP Assistance

Fertility

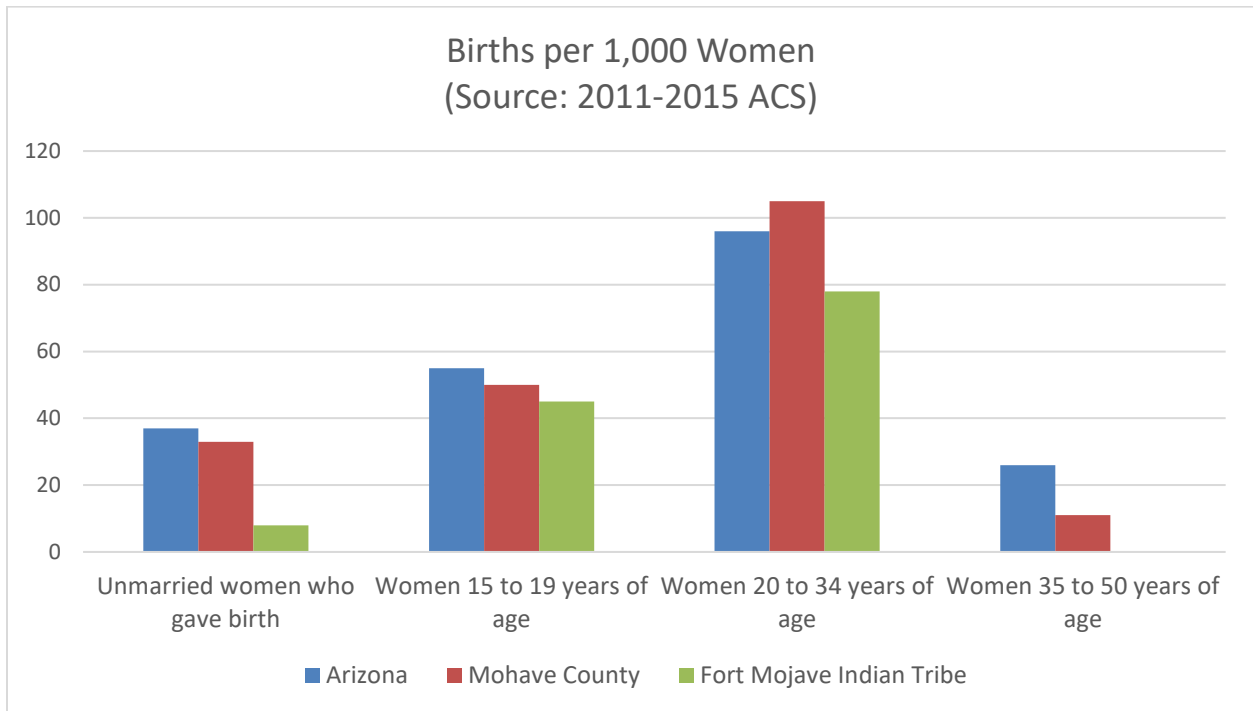

The birth rate for women between the ages of 15 and 50 years on the Fort Mojave Indian Tribe (4.4%) is similar to the State (5.4%) and the County (5.0%). The proportion of unmarried women giving birth on the Fort Mojave Indian tribes (0.6%) is lower than the State (2.1%) and County (1.8%) rates. See Table 19 and Figure 15.

Table 19. Fertility

Figure 15. Births per-1000 Women

These data provide a snapshot in time for the Fort Mojave Indian Tribe, primarily the status of the population at the time of the 2011-2015 American Community Survey estimates for the period.

**APPENDIX A:
THE FORT MOJAVE INDIAN TRIBE AMERICAN COMMUNITY SURVEY 2011-2015,
5-YEAR ESTIMATES MARGIN OF ERROR ESTIMATES**

ACS Margin of Error Estimates

The ACS estimates are based on data from a sample of housing units and people in the population, not the full populations. For this reason, ACS estimates have a degree of uncertainty associated with them, called sampling error. In general, the larger the sample, the smaller the level of sampling error. The ACS calculates standard errors for each estimate produced and publishes the 90 percent confidence level margins of error (the Census Bureau standard). You can be 90 percent confident that the interval within the margin of error from the estimate includes the true value. Users can add and subtract the margin of error value from the estimate to find the top and bottom of the range within which the ACS is 90 percent confident that their estimate lies in.

Understanding margin of error

A term you will often come across in survey research is "within the margin of error." Most people hear the term frequently during election season when results from polls are reported. Many surveys and polls collect data from a representative sample of a population to make determinations about a larger population. Results would be somewhat different each time the survey is administered to a different representative sample. The margin of error accounts for these differences by calculating an upper and lower boundary the true result would likely fall between if every member of population was surveyed.

For example, in the case of Fort Mojave Indian Tribe the ACS has established that there are 1,062 persons present on the Fort Mojave Indian Tribe. The survey also indicates that there are 490 males and 574 females in the total population, with a margin of error of plus or minus (\pm) 145 males and (\pm) 160 females. See Table 2 margin of error estimates. The margin of error tells us that if the same survey were administered to the Fort Mojave Indian Tribe tribal members again, it is highly probable that the true population for males would be between 345 and 635 males and similarly that the true population of females would be between 414 and 734.
