

Radiation Safety Briefing Documentation – Source Material

1. Identification of areas where radioactive source material is used or stored.
2. Procedures for the disposal of radioactive source material.
3. Health effects of exposure to ionizing radiation.
4. Response in the event of spills, emergencies, and unsafe conditions.

I, the undersigned, acknowledge that I have attended the Radiation Safety Briefing for Source Material.

During this training session, the topics listed above were explained to me and I understand them.
