The Discover Guide

CONVENING OF PARTNERS
— BETTER TOGETHER —

Usage

The Discover Guide provides middle-grade students an interactive way to explore how their interests, passions, abilities, and cultural influences can influence life after high school. As students investigate these things, they will discover careers that fit their lifestyle and personality—and how to get there. The Discover Guide also helps students develop an Education and Career Action Plan (ECAP) by the time they reach the 8th grade.

The Facilitator's Guide

Usage

The Facilitator's Guide provides teachers with an interactive resource to use with middle school students to explore their interests, passions, abilities, and influences. The Facilitator's Guide provides step-by-step directions and supplemental activities to teach students the information displayed in the Discover Guide. We designed the guide to offer a lot of flexibility on instruction—you can assign activities for homework or incorporate them into classroom activities.

At your table, please discuss the following:

1. How have you used the Discover Guide or how do you plan on using it?
2. How can you present the Discover Guide differently after gaining new knowledge and resources?
3. What is a unique way that you are helping your students reach their post-secondary goals?

Be ready to share!

I will be reaching out to those of you who have expressed interest in a College Campus visit. I will need to speak to someone from your school/district to confirm the travel reimbursement.

I do have Facilitator Guides for you to take with you. You may pick them up at the Information desk as you leave the convening.
